

# EthnoNationalist Revolution

[oxwugzccvk3dk6tj.onion/pol/](http://oxwugzccvk3dk6tj.onion/pol/)

1. We are Ethno-Nationalists. We want to live in a nation with common ties of blood and culture; an actual shared identity and common purpose. Not a mere economic zone up for grabs to anyone with the money and status to gain a document that declares them a citizen or a dumping ground for the cowards and Trojan horses called “refugees” or a rotting carcass for illegals to siphon funds away back to their home countries. We are not civic nationalist cuckolds.
2. We are environmentalists. We want to manage the resources of our nation in a sustainable fashion and ensure that a thousand years from now we can still actually inhabit and thrive in this land. We do not limit ourselves to one pet issue like “climate change” but care about the whole host of issues our nation faces from deforestation to poor water quality to urban sprawl brought on by importing millions of invaders every year to demographically replace us. We genuinely care about the environment beyond virtue signalling and imposing useless carbon taxes.
3. We oppose genocide. We recognize that white people are not the ones overpopulating the world, that in fact they have below replacement rates birthrates and are in demographic decline, and that demographic replacement (genocide) is not an acceptable solution to this so called “problem”. We encourage healthy white men and women to have large white families to make up for all the people too sick and morally perverse to have families of their own.
4. We sympathize with the native peoples we share our countries with. We support them in the fight against degeneracy that they might overcome the existential struggles that endanger the continued existence of their tribes. The loss of human biological diversity due to the threats of globalism is something to be mourned not encouraged. We are a more true ally to the Native American man, provided he has high ideals and noble purpose, than any other faction who’d only throw money at the problem and be surprised when nothing changes.
5. We want an end to foreign aid. Tremendous amounts of wealth, food, medicine, doctors, and other resources have been wasted on foreign nations just for their problems to grow worse over time rather than letting nature correct the issues. Had we ignored the starving thousands back then, we wouldn’t have to deal with the starving millions today, and the starving billions tomorrow. We support only the industrialists, the innovators, the pragmatists, and other individuals abroad who at best need a little support or investment to fix their own countries up themselves. If such persons are completely lacking; we will surely provide them soon enough by deporting all the skilled non-whites in our nations back to where they belong.
6. We are not spineless coward pacifists nor do we prefer war if a peaceful solution exists. We want to make our demands and our values known and for you to understand that, should you suppress us by seeking charges or denying our freedom of speech, we have no qualms with taking back our nation by force. The very reason that tolerance is a virtue is the alternative is far more expensive in terms of lives lost and property destroyed; if you can’t tolerate offensive ideas, posters, and speeches; then we might as well fight since we’re going to suffer captivity and death anyways.

**In short; We Must Secure The Existence Of Our People And A Future For White Children.**
