[>>308324589](#)

Most songs in the Diva games use Meiko V1. That's way back when they used fancy pantsy algorithms to have the computer make a voice based on samples. Now since V2, Vocaloid directly modifies audio samples to create the singing voice. That's why V1 sounds like a garbage disposal (for the most part).

Keep playing until you no longer have to think about what button to press.

Hard to explain. Instead of your mind going "Triangle button. I have to move my finger here and press triangle." Basically you'll get to the point where your finger automatically moves to whatever button has to be pressed. After that, you just play by ear, which is when it gets really fun

Not a slut, but the fanbase theory is that she definitely has a bit of a 'if you got it, flaunt it' personality and tends to see herself as the sexiest of the group (which leads to shenanigans when she accuses Luka of stealing her sex symbol status).

[>>308377780](#)

It's not a rumor, all of sega's newer boards including all the ring boards and NU run on differing version of windows embedded.

Apparently some of the diva cabinets use the NU board which runs windows 8 embedded with an i3 and a gtx 650 ti. If someone linked the binary files and the assets it might run on standard windows, but since the game was designed around the 650ti, if you don't have that gpu you might run into issues.

■ **Anonymous** 08/31/15(Mon)18:42:04 No.308380323

[>>308377780](#)

>it doesn't on windows

Yes it does

<http://www.system16.com/hardware.php?id=903>

Modern arcade machines are just purpose build PCs, custom PCBs like the Sega Naomi or Capcom's CPS boards are long gone

[>>308377324](#)

Even though you can rip the ISO off the machine, most of the time it wont work on another computer due to how optimized it is for that build, Blazblue CS 1 ISO got leaked and even with a speedhack "Emulator" it ran like shit on most computers at the time

The arcade machine sega is using for Miku (Sega Ring edge 2) now doesn't require Windows XP AE anymore since each game has its own drivers for the machine, removing the need of an OS, however multi game machines that use the Ring Edge 2 still run windows XP AE running a game loader program so you can swap games whenever you want (Works like tis, you see an arcade machine running GGXrd but you want to play +R, you hit the home buttons, it quits the game back into windows, then boots up the game loader where you can pick your game on it)

<http://www.system16.com/hardware.php?id=982>

I can't say that it would really beat out diva since it's way easier to pass than diva over all. Diva's got a few more curve balls to it, even in easier difficulties.

Kinda digging the song choices a bit more in IA/VT though, the inclusion of teddyloid probably helped a lot with that too.

Cheers for the list. Only ever heard what's on Project Diva f and I liked these ones the most. Not sure what kind of genre I'd put them in, rock/pop? I don't know, I just know they're catchy and fun to play

Secret Police - Miku Buriru-P

ACUTE - Kurousa-P

Remote Controller - Jesus-P

HachiHachi Flower Fight - Moja-P

World's End Dance Hall - wowaka

The MMORPG Addict's Anthem - Satsuki Ga Tenkomori

Nostalgic - Yuukiss

Unhappy Refrain - wowaka

Tokyo Teddy Bear - Neru

Senbonzakura - Kurousa-P

Never listed them like this before, gonna check out the producers of these songs now

■ Anonymous 08/31/15(Mon)21:01:24 No.308392437

>>308392062

I got the three costumes one, that's kinda disappointing.

PSTV might be an interesting idea. Well since IA/VT is the only thing that I'm really playing right now on my vita I could try the JP account
