

In this e-book I show you a simple way to get free Games for the big game-platforms. Steam, Origin and uPlay. It's very simple. You need only about 15-30minutes to start, and then 2-5mins to get a Key. You can sell this Keys for a good price to earn Money with it! Start your own Keyshop! (you don't have to invest money!)

Is this illegal? No its not illegal, its fully whitehat!

Here a small overview:

- Search a website with Game-Tests
- Write an e-mail to a coder-company or to a publisher
- Wait to get your key!

Point 1:

Search a game you want. Its better when you search for new games! We try it with the brand new Game "Next Car Game" from BugBear. It's the Coder AND the Publisher! You can found easy this information from Steam. Search the game on Steam and scroll down, under your friends you see the Information.

Point 2:

Search in Google for there website. In this example: www.bugbear.fi – Search there contact-mail-adress. Its better you use the e-maill for press. press@bugbear.fi

Point 3:

At this point, you can use your VPN if you want. It's not illegal but it's not friendly! Search for a website they test videogames. Its better you use small websites. Like the german <http://www.playnation.de> – its good when the publisher don't understand whats on this homepage is! You also can use a "Lets Player" from Youtube. But he should not have 3million sub's. Its better when they have under 1million.

Point 4:

Create an e-mail adress which has to do something with the website or the YouTuber. Like play-nation@google.de – its much better when you can host your own e-mail Server! You can make e-mail addresses like business@playnation.de. Some serverhosters sell you a e-mail server for 1\$/month.

Point 5:

Write a e-mail with your new own e-mail address to press@bugbear.fi (as example!). You want to write a review about the game, or you want to make a Lets Play from it and you asking friendly for a key! **The E-Mail should look like a e-mail from the playnation website.** You can steel some images from there homepage.

Point 6:

Wait for your key!

At least

You can ask for a second key to test co-op or multiplayer! Don't ask with the same website the same publisher. Use another one, and not to often! It's very easy to get small indie games or games from small publisher. When the publisher don't want to send you a key, ask the coder!
