

Guide to getting Counter Strike: Source Beta Edition after closing date

Game link: <http://store.steampowered.com/app/260/>

All you need is a working steam account and it does not need any games on it.

- 1) Start up steam and sign into your account.
- 2) Open up your internet browser, not the steam store or community browser.
- 3) In the browser bar enter the following: **steam://validate/260**
- 4) It will bring up a menu saying validating counter strike source beta, wait for this to finish.
- 5) Once that has finished then proceed to enter this:
steam://install/260
- 6) The steam store should open up on the beta page and your download will start now.
- 7) By this time your counter strike source beta should be on download and you will be playing it in no time.
