**I am going to tell you how you can create your
own Download Page like**

www.shareadownload.com/download

with an Aweber form in it....

**To build your own money making list for long
term profits!**

Here is the Step by Step procedure to create an account at aweber.com

1. Go to <http://www.whitehatcopycat.com/aweber.html>
2. Read the Discounts for Extended Terms, select the plan as per you convenience.
3. Scroll down to the Registration Form, as shown in the Screenshot Below ->>

Account Login Name:

Your login name can be up to 15 characters long, including lowercase letters, numbers and hyphens, "-", and must contain at least one letter.

First Name:

Last Name:

Organization (optional)

Street Address 1:

Street Address 2 (optional)

City:

State/Territory:

Postal Code:

Country: 

Email Address:

Telephone Number:

Mail sent through [AWeber] has the highest delivery rate of any competitor we have tested.

Jonathan Mizel

I just successfully put a signup web form on my website, thanks to the complete and easy descriptive video and written instructions. Excellent! If a middle-aged geologist with a graduate degree in finance and little to no web savvy can do it, then anyone can. Thanks!

Jim Steel MBA P.Geo.

Your service is terrific! I've never dealt with an organization that responded so thoroughly, quickly, and patiently.

Gary Screaton Page

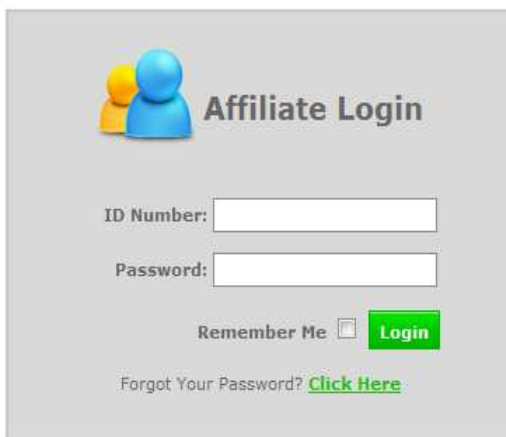

[Hear Other Customers](#)

4. Fill up the Registration Form and choose your payment option. Then click on **I Agree, Complete My Order**
5. After completing the registration process, click on Sign In at the top right corner.
6. Fill the Username and Password that you created in the required field. If you created a username for customer account, fill it in customer login area. If you created for Affiliate account, fill it in the affiliate login area. Click Login after filling username and password.

See the Screenshot Below for reference ->>

The Customer Login form is displayed on a light green background. It features a logo of two stylized figures (one blue, one yellow) to the left of the title "Customer Login". Below the title, there are two input fields: "Login Name:" and "Password:". To the right of the "Password:" field is a "Remember Me" checkbox. Below these fields is a green "Login" button. At the bottom, there is a link "Forgot Your Password? Click Here".

The Affiliate Login form is displayed on a light gray background. It features a logo of two stylized figures (one blue, one yellow) to the left of the title "Affiliate Login". Below the title, there are two input fields: "ID Number:" and "Password:". To the right of the "Password:" field is a "Remember Me" checkbox. Below these fields is a green "Login" button. At the bottom, there is a link "Forgot Your Password? Click Here".

Let's Get Started!

Now I will show you How to work in Lists

Each list in an account has its own messages, subscribers, and sign up forms. You may set up as many in your account as you'd like. For example, if you have multiple websites, you can have a list for each.

1. To find your Current List, **Go to Current List on Left Top of the page.**

See the screenshot below (It shows the default list of your account)

2. To select the list you'd like to work in, choose it from that box.
3. Once you have the list you need to work on it. So as to navigate around its settings, you'll use the row of tabs and menu options at the top of the page.
4. Use your mouse pointer over top any of the tabs and you'll find menu options. For example, if you want to search through your subscribers, **move your mouse over the Subscribers tab, and then click on Search.**

See the Screenshot below for reference ->>

Now that we know how to get around in the account, let's set up our first list.

Creating a New List

1. Click on Create and Manage lists.

See the screenshot below ->>

2. Click on +create a New List at right side of the page.

See the screenshot below ->>

(+ Create a New List)
[Back Up & Export All Active Lists](#)

3. Fill up the form which contains List Settings and Company Branding.

See the screenshot below ->>

List Settings:

Set your list name, "from" address and unsubscribe page formatting.

List Name*:

List name, "Test", is available.

Description*:

From Address*:

Subscriber Alerts: 

Company Branding:

Information used to brand your unsubscribe page and email archive.

Company Name:

Website URL:

4. Click on **Save List Settings** after filling the complete form.

To edit the Existing List, follow the steps as shown below->>

1. Move your mouse pointer to the My Lists tab and click on List Settings as shown in the screenshot below.

2. **Write Description**: Choose a few words to describe the subject of your list. When someone Clicks on the unsubscribe link at the bottom of your messages, they will be reminded of what it is they'd subscribed for with this value.
3. **List Name**: This sets the name you'll see in the Current List box. Enter in your desired name, and wait a few seconds. Just beneath the box, you'll see either a green or red highlighted line letting you know of whether or not that name is available.

See the Screenshot below for reference ->>

List Name*:

List name,"efewfds", is available.

4. **Company Branding**: There are a few places where you're subscribers will be directed to pages hosted on Aweber system.

5. Fill the Company Branding as shown below:-

Company Name: Fill the Name of your company

Website URL: Enter the address for your website so subscribers can visit from these pages using your link.

Logo URL: If you have a logo published on your website, copy its location (URL address) and paste it in the box.

Divider Color: Type in a color name for divider or use the color code, if you have it.

6. Now put a Reply Address as shown in the screenshot below->>

Email Address	Name
<input type="text" value="test@example.com"/>	<input type="text" value="Test"/>
<input type="text"/>	<input type="text"/>

7. Enter your name or the name of your company, something that your subscribers will recognize as soon as they open their e-mail. Mark the "From/Reply" checkbox to specify this address as the one that you want to appear as the sender of the messages in your list.

See the screenshot below for your reference ->>

From/Reply	Notifications	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Delete
<input type="checkbox"/>	<input type="checkbox"/>	Add
		Save

NOTE: Avoid using e-mail addresses found at the domains of free providers (e.g. @yahoo.com and @gmail.com) or Internet Service Providers (ISPs like @verizon.net), since spammers often use these for their reply addresses.
Needless to say, you don't want to be confused with spammers.

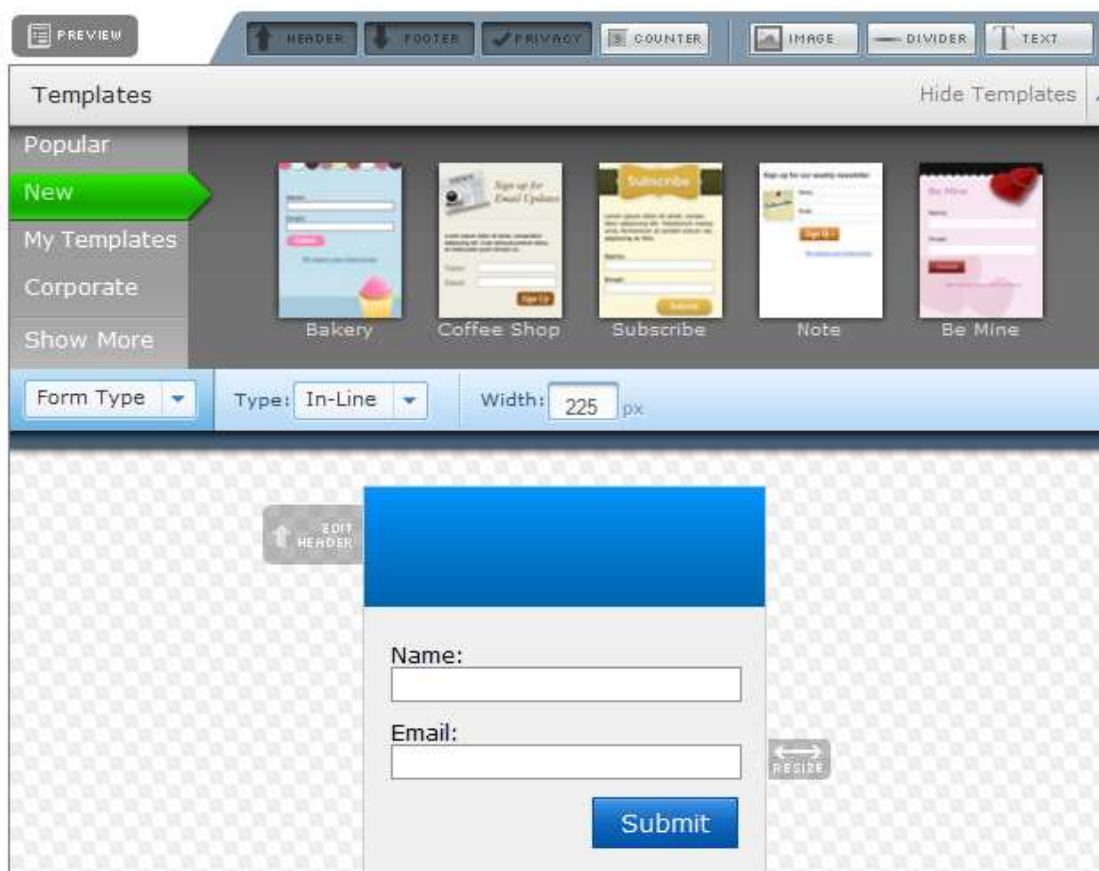

Now that we are done with our lists, let's add the form to your website.

1. Go to web form and click on Create Web form. As shown in the screenshot below->>

2. Choose the template from the templates available, load the template. Edit it as per your need (e.g. Header, footer, colors etc) and click on Go to step 2.

See the screenshot below ->>

3. Now you can customize you web form by giving it a name and few other changes. **Click on the Thank You Page** and you will get 4 more options to choose (e.g. Audio, Video or Custom). Now select the custom option from the scroll down and enter your own Thank You or Return Page. This is the page people are send after subscribing, so this should be your Download Page with ad or your Platform Link. Do the same for Already Subscribed Page (For already subscribed visitors). Now **click on Go to Step 3**.

See the screenshot below ->>

Form Name*: My Web Form 3

Thank You Page: **Basic Version** Simple Page Customized With Your Logo **Audio Version** Page With Your Logo And An Audio Player **"Smart" Video Version** Confirmation Text With Our "Smart" Video **Custom Page** Use Your Own URL **Stay on Current Page** Subscriber does not see a thank you page

Already Subscribed Page:

Ad Tracking:

Start On Message: Welcome Message (1st Follow Up)

Pass Form Data: ☐ Forward subscriber information to your thank you page (e.g. for [personalization](#))

✓ Save Web Form **Go To Step 3 >>**

4. Now you will see three options to publish your web form. Choose **I Will Install My Form**. Now you can choose from JavaScript Snippet and Raw HTML. Usually, you'll want to choose the default, "JavaScript Snippet" version for reasons of simplicity.

See the screenshot below ->>

I Will Install My Form

You are comfortable with HTML and have access to edit your pages

Javascript Snippet

The Quick and Easy Version

Raw HTML Version

Advanced Design Customization

Recommended

- If you change your form here, you won't have to update your website.
- Track statistics in your account.

You can paste the snippet below anywhere between the body tags of your website:

```
<script type="text/javascript" src="http://forms.aweber.com/form/31/665130131.js">
</script>
```

My Web Designer Will Install My Form

Send an email to your designer containing the HTML and the instructions they need

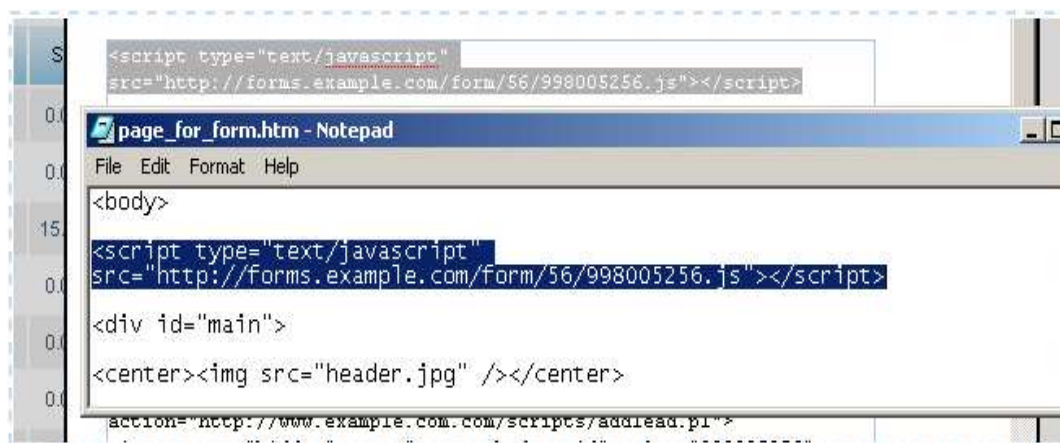

Have AWeber Host My Form

Link to a page that has my form

5. When you're ready to publish the HTML to your site, just copy it to your clipboard. In order to publish the web form to your page, you'll need to have access to make changes to your website. You need to get to the HTML source of the page, so that you can copy the HTML and paste it in.

Once you've found the HTML, just paste in what you've copied.

See the screenshot below ->>

Save the changes. Now reload your webpage (making sure your cache is clear in your browser so that it's loading the changes you made). You should see your form published with a place for your subscribers to opt-in to receive your information.
