

**THIS DROPBOX EXPLOIT/TRICK WAS 100% DISCOVERED BY ME, 'THEUNKNOWN' FROM HF. I PERFORMED MANY TESTS TO FINALLY FIGURE OUT HOW TO DO THIS. I HAVE NOT SEEN THIS METHOD ANYWHERE ELSE YET. ALL CREDITS GOES TO ME. PLEASE DO NOT LEECH THIS METHOD WITHOUT GIVING PROPER CREDITS TO ME. THANK YOU AND ENJOY YOUR FREE SPACE!**

### Information!

This was written Friday thirteen in April 2012 and discovered the day before. When you read this the exploit may have been patched or limited to 16GB as they claim. I do not take responsibility for this. As more and more people will use this method Dropbox will probably soon discover something is wrong. I don't know how long Dropbox will run this campaign either, so hurry up and get your free space now!

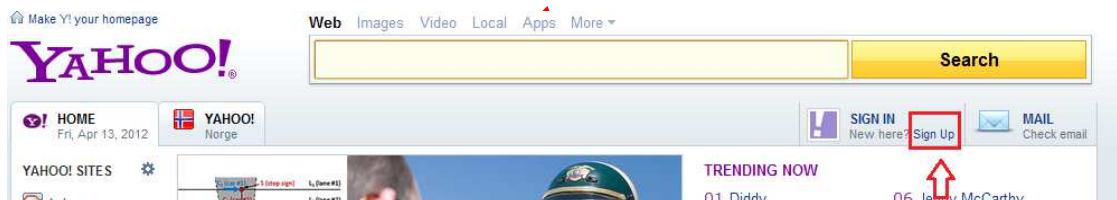

### PART 1 - Set up your yahoo account

1. Go to [www.yahoo.com](http://www.yahoo.com)

That is the fastest and easiest way to register a new email account

You can sign up any other email service if you prefer that. Just remember the log in ID.

2. Click sign up

3. Fill out the form
4. Click register
5. Leave it, log off or whatever. Be sure it is 100% finished.

### PART 2 - set up a virtual machine

1. Download Oracle Virtual Box - Google it
2. Install it

3. Watch this movie - <http://dl.dropbox.com/u/35303814/TUT/install%20windows%207%20vm.mp4>

Follow the steps, it's easy. After a restart you will come to the next step below.

4. Watch this movie -

<http://dl.dropbox.com/u/35303814/TUT/install%20machine%20virtualbox%20part%202.mp4>

Follow the steps here as well, piece of cake.

You will need a Windows.iso image for this. You can find it on thepiratebay.org and download it as a torrent

Search: Windows 7 Build 7100 RC x86

Download the first one, and then you'll use the same as I do and that is working for sure.

Doesn't matter if you are running 64-bits or 32-bits. (If you wondered)

This part will go much faster after the first couple of times, I promise.

### **PART 3 - get the extra space**

1. Open internet explorer in your new virtual machine
2. Go to [www.dropbox.com](http://www.dropbox.com)
3. Log into your normal account
4. Click "Get Free Space!"

5. Copy the link

## Invite your friends to Dropbox!

For every friend who joins and installs Dropbox, we'll give you both 500 MB of bonus space (up to a limit of 16 GB)! If you need even more space, [upgrade your account](#).

### Invite by email

Invite your contacts (Gmail, AOL, Hotmail, Yahoo, etc.)

Email

Password

[Retrieve contacts](#)

or invite email addresses:

Type a list of invitee email addresses,

[Send invites](#)

### Invite friends from Facebook or Twitter

Always have your stuff when you need it with @Dropbox. 2GB account is free!

43 characters remaining

[Share on Facebook](#) [Tweet on Twitter](#)

or use this link with friends  [Copy link](#)

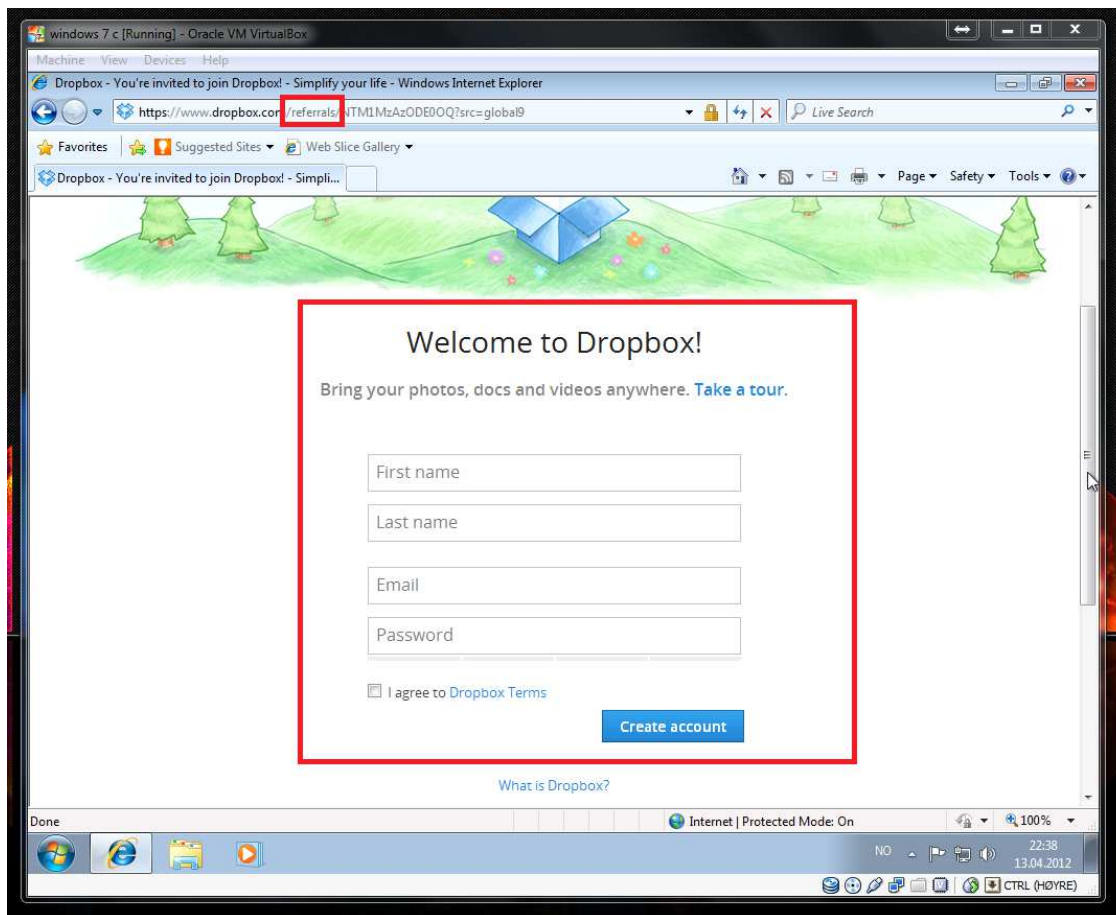

Once your friend joins and installs Dropbox, you'll both get extra space. Hooray!

Afterwards you can [view the status of your referrals](#) or visit our [Help Center](#) if you have any questions.

6. LOG OFF!!! IMPORTANT!!! LOG OFF YOUR NORMAL ACCOUNT BEFORE PROCEEDING!!!

7. Paste the link in the address bar

8. Fill out the form with the email you created in Part 1 and agree to terms, then click "Create Account"

## 9. Download

It is important that you download and install to get the free space!

## 10. Install DB on your virtual machine

## 11. Run the program

## 12. Click "I already have an account"

## 13. Now sign in with the one you registered in step 8

You will now get a balloon pop-up on your desktop like this one:

Notice that I, when I wrote this, had 17.2 GB of space and that Dropbox clearly states "UP TO A LIMIT OF 16GB"! (Picture below) This exploit avoids this.

## Invite your friends to Dropbox!

For every friend who joins and installs Dropbox, we'll give you both 500 MB of bonus space  
(up to a limit of 16 GB)! If you need even more space, [upgrade your account](#).

Repeat the whole process over and over again until you have gained the amount of space you want. Your space will increase by 500MB per install. This method does take a lot of time if you want a lot of space, but as far as I know this is the only way to gain unlimited space. It's still better than paying! I signed up for over twenty yahoo-accounts on school. When I came home I started 8 VM at the same time installing. Left the computer for an hour and came back when they were ready. I repeated the process several times. This was my method of speeding things up a bit; you can sure find your own.

I use approximately 1 hour to install 8 virtual machines, then I use 15 minutes to install Dropbox and gain space with all 8 accounts. The first hour is basically just waiting, not work.

IMPORTANT! - You need to repeat the whole process. It will not work to use the same virtual machine twice. Nor will it work to clone it. You need to install it from the start.
