

# \$45/hour method

---

## By Inhalation

Hello, thank you for purchasing this e-book!

This will get you \$45+ / hour, with just some effort. You can apply this method while playing games or doing something else.

First of all, you will have to sign up at  
<http://www.liveperson.com> as an expert

Once you've done that you will have to create a profile for your Expert user, select the listing that you're really good at.

Be sure to sign up with a **great description** of what you're good at, why you're good at it and **why somebody should choose you as their expert.**

**(You don't have to be really good at this, you just have to keep the chat flowing.)**

After you've completed the sign-up and the listing, you will have to wait **24-48 hours** for the **approval**.

Once you've been approved, you will have to go to:  
<http://www.liveperson.com/help/profile-link.aspx>

And you will have to select your listing, and then you will be able to "help" your customers.

*You don't have to really help them, just google the things they're searching for, and try to keep him chatting as long as possible, as he pays/minute.*

### **TIPS:**

Be online as much as you can, because your customers will not like when their expert is always offline. Just do this when you're playing a game, just take a few minutes when you have a customer. I just have your computer

on and wait until a customer needs help.

**Do not take a long time to chat**, every minute the customer has to pay x amount of money (the money you've chosen they have to pay each minute) every minute. You can connect an external monitor, so you can do some other things on the other monitor.

Have a **great profile** image, search on Google Pictures for a **guy that "looks" trustable and not a complete idiot.**

Download their **Expert Messenger**, which could be obtained here:

<http://www.liveperson.com/professional/software-download.aspx>

So thanks for buying, and good luck!
