4. Upload the Html page / landing page with the aweber.com code on to the webserver
5. Make two personalized mail id with the domain you have created. E.g. earn@quickt看odollars.com; payment@quickt看odollars.com (Use these same id's while making the follow up message on aweber.com
6. Now initiate the US traffic campaign which you have bought (Should at least be of 10,000 visitors).
7. Set the traffic campaign to 200 visitors per day so as to keep the clicks genuine and realistic

That's it you are done!

What will happen now?

Out of the 10,000 visitors which you have bought approx. 10-15% visitors will register at you site (Depends on how appealing the site is)

10-15 % means 1500 people approx.

After registering with your website these 1500 visitors would get the follow up message and almost all of them will click on all the shortened links of the CPA offer that you have made and only 500 people will actually complete the offers.

Most of you would be worried that if everyone who registers completes the offers than you will be detected by the cpa company and get banned, but trust me that doesn't happens. ONLY 20-30% of the people who

register will complete the offers while most of others would be just clicking and checking the offers and will never complete it and thus keeping the conversion rate realistic.

Most of the email/zip submit or small survey offers can fetch you anything from \$1.5-\$3.5 so 10 cpa offers will correspond to \$20 in your cpa account and assuming that 500 people are completing the survey your earning will correspond to $500 \times 20 = \$10000$
WOW that's a lot of money!

MY Experiment / Story

I made my [site](#) somewhere on last week of April.
It's called QuickTwoDollars.com

I did everything which is mentioned above. Started by making a new CPALEAD account to registering a new domain.

I bought 10000 visitors from US and set the campaign at 200 users per day and guess what almost every day 15-20 people started registering on to my web site and 8-9 people completed all the offers and I'm earning \$160-\$180

This has been my average and till the time my campaign of 10000 visitors will be over I'm expecting to earn somewhere around \$8000

I need to get my site redesigned by a profession so that I can increase the registration rate and thus the conversion rate.

Visitors after completing the offers mail me saying ‘pay me now I have completed your offers” and I reply to them as you haven’t successfully completed all the offers and you are not eligible to get paid. Hence I never paid any one yet.

What will I do next after the 10,000 visitors campaign is over?

I will sell rather flip the website at flippa.com for at least \$300 and will start a similar site with a different domain name.

What can you do more?

Get your website Designed from a profession so as to make it very attractive (Put up a website design contest in the designing forums and select the best design at the cheapest price)

Buy 20,000 visitors or more and set the campaign to 1000 visitors per day and Enjoy money falling on to your cpa account.

Update the offers from your CPALEAD account time to time to keep the links live and active

Make Couple of such sites or join couple of CPA websites and use a Mixture of links from all of them so as to distribute your earning

Happy earning 😊
