Becoming a man!

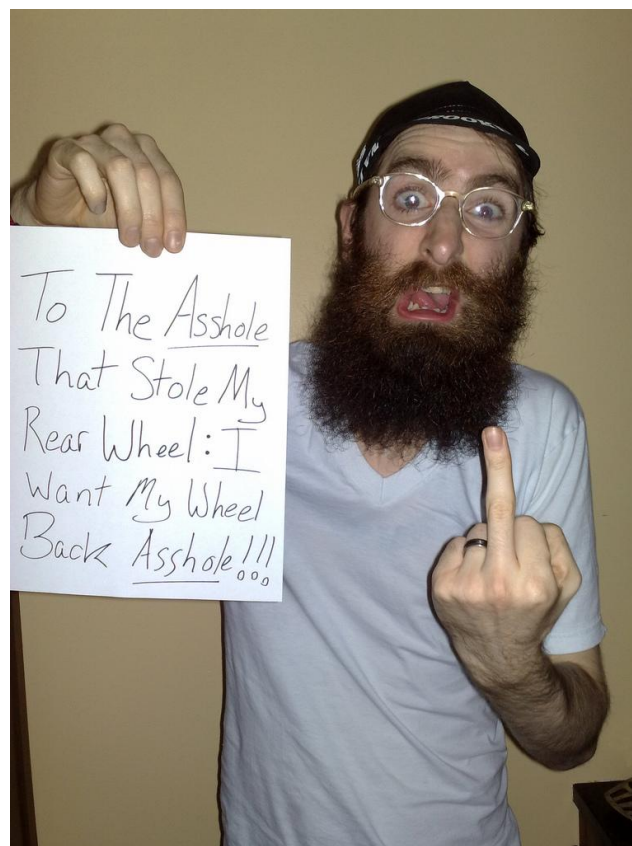

It's time to man up and get your "Sexy mind" back!

Go to google pictures and search something random, like Troll face.

Select your image and save it to your destination!

Now upload the image you choose to imgur.com

I using this for my posts!

Now don't get offended I don't know him and he isn't pointing at you!

He's just mad xD

Well it's time to create your very first post on your blog!

Klick "New post" and create a title that is sexy and will lure many people!

Now this is pretty fucked up but im telling you to create a title that looks like this!

"Two 14 year old girls fingering eachother" This is an example!

Get some description with your “sexy mind”.

Now go to your adfoc.us and paste the direct link to your image in the “Shrink bar”.

You will get another link, copy that link and paste it in the “Shrink bar” again!

Do this about 4-15 times!

Go to your blog post that should be ready just some links remaining!

Insert a link and name it “PREVIEW”.

Now if you want some extra cash why not upload some pics to “FileFlare, Filelce, Sharecash ETC...”

Shrink the PPD link about 4-15 times and insert it into the post and name it “DOWNLOAD”

Now use the same link to make some mirrors! “Actually the same link”

So create about 3 mirror links and name them

“MIRROR 1, MIRROR 2, MIRROR 3”.

Now your set to post your post!

You sir are now a official “Fake porn website owner”!

How does it feel?

Well if it feels bad skip to the next section and I will make you feel happier!

Making the clicks!

Now I recommend turning your browser flash/images off if you don't want to see annoying gay porn/porn!

Visit this site: <http://www.motherless.com/boards/>

“I do not support the link above!”

Choose your section there is:

- Confessions (Not recommended)
 - Random (Recommended)
- Motherless (RECOMMENDED!)
 - Soapbox (Recommended)
 - Requests (Nah)
- Funny (Nah but visit the section pretty funny :)
 - Chicks (Recommended)

Now you don't need to sign up to create topics so just simply choose the section you want and klick “New Topic”.

Now apply your “sexy mind” again and write some fucked up shit like:

“Hey check out this (Whatever your blog post was about) it's fucking amazing and free to download to. Visit [yourblog.blogspot . com](http://yourblog.blogspot.com)”

Now it's important you don't use | <http://> | [www.](http://www) |

Always use a space between “dot” and “com”!

Staff will review posts with posts more often!

Well use your imagination that's how I got my 200000 clicks!

Method for people -18!

I doubt that -18's skips the part above so I guess you are a badboy now...

Okey back to topic!

Well im going to guess that you have a blog and designed it like I said above.

So if you don't have a blog yet go to the top and read until we get to the 18+ part...

You got a blog great!

Now go to google and search for:
ROMS and Emulators (DS GAMES RECOMMENDED!)

Comics

Games

Runescape

And Porn passwords!

Choose one of the Niches above those are the best on the market right now!

Dedicate your blog to the niche you choose!

Now post on your blog as you did before with a description about your product!

Create a nice title!

Now put in your adfoc link just as before but this time it's for one of the stuff above!

Porn passwords and ROMS are the best right now!

Advertising your product!

Now it's time to advertise your product!

Things you should have done:

- A blog.
- A post in your blog with your product.
- Adfoc links that you have shrunk a couple of times.
- A product!

Go to <http://www.4chan.org>.

Now there is a lot of sections go to the section you think fits your product!

Create a new topic linking them to your blog or adfoc link!
The views will grow very fast and your money will rise but not really as much as my special method ;)

Enjoy!
