What makes us different

Unlike other upload websites that give you insanely low prices, such as \$10 for 1000 US downloads, we give you from an average of 40 to 80 cents per download! That's \$800 for 1000 downloads - eighty times more than any other upload cash website! The best part is while we pay atleast 40 cents, there are many offers that go above the 80 cent upper average, sometimes reaching a few dollars! We guarantee you will earn more with us than any other paid-to-upload website - our revolutionary platform provides you with everything you need, from great features to the highest payouts around, to start making money with ease!

Here are some assorted features:

* Highest download rates around - at least 40 cents for any US, UK, CAN, or AUS download, and at least 25 cents for any international download. Remember, 40 cents is a

base rate. Most downloads earn you over 60 cents! You will earn the most with us, guaranteed.

+ We are the pioneers of the high paying upload site concept. Therefore you can be sure you are with the most sophisticated and professional PPD site around!

- + Unmatched System - Our system is elegantly coded to incorporate all the features you need, while at the same time making it as easy as possible for you to earn money!
- + Affiliate System - refer users and get 10% of what they earn!
- + Premium Memberships - downloaders can buy a premium membership with us. If they buy one after visiting your file, you get 30% of the price!
- + Simple sign up - Start earning in less than 30 seconds!
- + Affiliate messaging system - you can now talk to and train your affiliate army to make you even more cash!
- + Low cashout limit - get your money after earning only \$10 !
- + Accepts any file type!
- + Super secure - your details, files, and earnings are safe with us!
- + International downloads - get paid for any country!
- + Flexible, on time payments!
- + Easy-to-use folder-based uploads manager!
- + Friendly, 24/7 Online Community on our Forum, Live Chat, TeamSpeak, and Ventrillo!
- + No "scrubbing" - nearly every other high paying download sites will "scrub" off perfectly good downloads, or not count them, and then even claim that they don't do it. Not us! Here you get paid for every download!
- + High-tech FTP, Direct, and Remote Uploader!
- + Payouts are constantly on the rise
- + We have a dedicated team of administrators and programmers who constantly release new features and optimizations!

Now, start making money with ShareCash! You absolutely don't have pay any fee to join, you can earn cash never so easy!

Make money with ShareCash is easy, you can share whatever with everyone, and earn your money. Signup with ShareCash for free account just 30 seconds and start making money in no time!

[Register here](#)

Let's start:

Do you love this site? Would like to make real money with ShareCash? Now it's time to start.

Dominating ShareCash!

ShareCash is a site much like Uploading.com as it allows you to upload files and then pays you as you get others to download your files. The difference between ShareCash and other sites is that ShareCash will pay A LOT more. ShareCash pays 400 to 800 dollars for every 1,000 downloads, where Uploading.com pays around 5

dollars for every 1,000 downloads. What I am going to show you right now is how you can grab a hold of ShareCash and make AT LEAST 50 dollars a day from it! So first if you have not yet done so, Click here [Create a new ShareCash account](#) and sign up for a free account. There is no fee to sign up and it takes a few minutes to do so. Now you should familiarize yourself with the site so take a good 5 minutes or so to look around. Note the Upload button on the side, that is where you will go to upload your files.

THE METHODS!

Now I have spent some serious time developing these methods and making them work. Some are quick and easy and will bring some good cash while others will take more time, but will bring unbelievable cash!

Method 1: YouTube

This is an easy way to get started. People will download anything from youtube. So to get started make sure you have an account with youtube. Next go over to daily motion and find a good strip tease video where the girl gets naked at some point in the video. Download the video from daily motion using www.keepvid.com and fire up windows movie maker. The idea is that we want to post the video up to the point where it becomes obvious that the girl is about to show off some skin (boobs or bottom half) and then we cut the video right there. Now what you're going to do is upload the cut portion to youtube. Since there is no actual nudity in this video (since you cut it out) youtube will not take the video down. Upload the entire video to sharecash and put the link in the description box next to your video. Give the video a long sexy name and watch as people download the entire video from your link in order to see the girl naked! Tons of people search for girls on Youtube so your videos will get plenty of views very fast.

Register here

Method 2: Orkut and Myspace method

Signup to yahoo and myspace account. Make around 300-400 friends on them. It will take little bit of time but you can do it easily if you spend around 1 hour daily on that and add around 50 persons a day. It's not so easy but it's not even so hard. I got around 500 friends within two weeks.

Most important thing: Concentrate only of UK, US and Canada people because sharecash only pays for these countries signups. It would be much easier for you if you join US and UK communities. If you are comfortable then try to make your profile by a girl's name. Mostly people add a girl more commonly than a guy.

After creating an ID with 400-500 friends, add your uploaded pic in your profile or update status. For example: Create a notepad file. Clock it with your sharecash link and add in your profile. Encourage peoples to download your file by saying that this is your phone

number, coolest or sexiest pic of yours, or be wilder like this is my nude cam show download it. There will be many hornies there to download your stuff. Update your profile daily and keep on adding more US and UK friends.

Method 3: Forums are your friend!

Ahh yes forums my favorite place to get downloads from. So what we're gonna do for this method is find any porn forum and copy a few porn passwords that people post up. If you just look around at a few places like <http://hackforums.net/> you'll find a few passwords. Now go ahead and copy those passwords into a text document and archive it with winrar. Here's where we're going to do things a little differently. Most people will go and outright post these files on the forums with your download link. Now this will bring in a few bucks, but when the passwords run out or someone sees a few postings about how they already use these passwords, your thread is pretty much dead. Instead your going to sign up to as many porn forums as you can and place your download link in your signatur with anchor text such as "Free GangBros Passwords." Then just post all over the place saying things like "Wow nice video" or "Thanks for the videos" stuff like that so people will see your name and signature. If the forum will not allow your download link in the signature just make a free blogger blog with the download link on there and have your signature redirect them there with the same achor text. You will see huge traffic with this method, trust me everyone wants free porn passwords!

Method 4: Roms and Emulators

This is my biggest money maker by far, and it's actually pretty easy to set up. The only reason that this is the most advanced method is because it requires a few things such as a website, hosting and some experience in creating a website and making it look decent. If you can make this method happen you will see a huge amount of downloads come through. What you do is search for nintendo ds roms and emulators in google. Now when you find a good site just download as many as you can. I use a few sites to download ds roms, but starting up I just went to mininova and downloaded a huge file with like 100+ ds roms. This got my site off the ground much faster and took the hassle out of downloading a 100 or so files seperately. Just upload all the files to sharecash seperately and post them on your new website. If you keep your site updated with new releases you can get a couple

thousand downloads in a day easy. If you submit your site to any of the top 100 Rom lists you can get some awesome traffic that way. Alternatively you can submit to digg and reddit claiming that you've found the best DS Rom site on the web. Just remember to put a disclaimer on your site stating that all roms downloaded need to be deleted within 24 hours unless the legal copy is owned. That statement will keep your rom site legal so dont forget it!

Register here

Method 5: Digital Comics

Digital Comics are very popular on the web currently, and no one is using sharecash to promote online comics. There are a few things you can do here. For one you can visit <http://www.lorencollins.net/freecomic/> and download a few comics and then post them on a blogger blog. Of course digg traffic works well here since comics usually cost money to download online. Another way to explode this is to use a site called 4chan.org. Now what you do is visit the comic sections pick a comic book you downloaded and post the front cover and then next to that post the download link. A small description will help with this and get a couple people commenting on it

Register here

Method 6: Exploit Lazyness

This is probably my favorite method just because it's actually very creative. What you need to do is go to any manual traffic exchange (look on google you'll find a ton) and sign up to a few. Upload a large picture or any small program that is about 1 to 2 megabytes in size and name it "Traffic Exchange Bot." Make a quick blogger blog and delete everything from the page except for the post and title. Make the title large and the body easy to read. State that you have a free traffic exchange bot that they can have to use for the traffic exchange they are on. You can customize the page and make one for each traffic exchange you use. People will download the file hoping for a bot, even if you don't have a bot for them to download once they download the file and see that its not a bot they will more than likely just move on with their traffic exchanging while you just got a download out of it! Make sure you .rar the file that you upload so it appears believable. You can participate in the exchange to get credits or just buy some, either way you will get conversions easily since everyone hates having to do manual traffic exchanges.

Method 7: Take help of websites or blogs

It was the simplest method and yet most reliable method. If you have a good website which got around 1K-2K visitors per day then create a simple banner and clock it with your sharecash URL. Try to give free ebooks related to your niche. Peoples just love free stuffs. For getting free ebook or something you can simply search on google, rewrite the whole content and then go. If you want to be bully then simply copy paste that method and give it for free. Ask your friends to place your free stuff clocked banner of URL to place on their websites or blogs.

[Register here](#)

Method 8: Make website or blog especially for sharecash

People just love free stuffs. When you are start getting some decent money from sharecash, just invest in buying a domain and hosting and make website dedicated to downloading free stuffs. SEO it regularly or to improve traffic always do yahoo answers posting along with link back to your website. Just don't spam them otherwise you will be punished.

[Register here](#)

Conclusion:

I hope with these methods you'll earn money as I did.Happy earnings.
