

How to exploit an online casino for constant cash

Author: [myNameIsNe0](#)

Thank you for purchasing this e-book! You do NOT have any resale rights of this e-book and you may not share this with anyone. **The less people that know about this method, the better.** If you purchase resale rights, your username will be added in this e-book but you cannot edit its content.

Introduction

Have you ever imagined of how much money those huge online casinos make? What if we could get some of that money by exploiting their system?

With this method we will be taking advantage of how the system of the biggest online casino works. The said casino is the Party brands (www.partypoker.com, www.particasino.com, etc.). The Party Brands is the biggest online gambling empire. They have an enormous number of games, players and of course huge profits. This is where we kick in to get some of those profits.

Can this method be applied to other online casinos too?

I believe this method could work on other casinos too, but in this casino it is much easier, because they accept “**Sarah**” as a payment method, which makes our life much easier.

Sarah: Explained

I think it is time to reveal who is this mysterious **Sarah**. As you have already understood, **Sarah** is a payment method. It will let us create many accounts, using different billing information, and also keep ourselves anonymous. Don't worry, nothing illegal is done. So, to use this method, go to <http://www.entropay.com> and register for an account.

The screenshot shows the EntroPay website homepage. At the top, there's a navigation bar with links for Login, Sign Up, For Consumers, and For Businesses. Below this is a main menu with links for Home, Virtual Visa, More from EntroPay, Fees, Using EntroPay, Security, About Us, and Support. The central part of the page features a large image of a woman lying on a couch using a laptop. Below the image is a quote: "I opened an EntroPay account and got my Virtual Visa card before my favorite song was over - now that's fast." To the right of the main content is a sidebar with sections for "Sign up now", "Existing Customers" (with login fields for Username and Password), "Customer Support", "For Businesses", and "News". The main content area below the quote lists four benefits of EntroPay: "It's a Visa", "It's Prepaid", "It's Virtual", and "It's Secure", each with a brief description and a "READ MORE" link. At the bottom, there's a small disclaimer about EntroPay's services.

July 2010
The top 3 obstacles to building a successful micro-affiliate community

Entropay is a company that issues virtual credit cards that you can reload with money whenever you want, and the best thing is that you can create as many of those virtual credit cards as you like. Now, the cool thing is that the Party casino and all the party brands, accept Entropay as a different payment method, and they accept it from every single country in the planet. There is also another bunch of payment methods, but some are limited to certain countries, and probably you won't be able to use the same PayPal or Credit Card, for 2 accounts.

I am not going to go through the registration process, because it is really simple.

Once you have registered for an account, you need to add a funding source, which will be your credit card. You will use this funding source in order to top up your virtual credit cards with money and then use them as a deposit method in the online casino. It is really simple to create a new virtual credit card. Once you log into your account, you will see this screen:

Your EntroPay Account

Your last successful login was on 15 Feb 2011 at 14:05 from IP 178.59.236.148 (GR)

bxaris is certified by the UK Financial Services Authority (FSA) to issue electronic money for EntroPay
EntroPay Virtual Visa cards are issued by Bank of Valletta, pursuant to a license from Visa Europe

Simply click on the “Create Card” link, and follow the instructions. It should take less than 1 minute. As you can see by the dates, I am using it regularly. I currently have only 4 virtual credit cards, because I am destroying the ones I don’t need any more. You can do that too, to keep things smooth and organized.

The method: Explained

Now, after you have created your Entropay account, it is time to use it in the casino. Sign up as an affiliate here:

[Sign up as an affiliate now!](#)

I would appreciate it if you signed up with the link above. It will just help me earn some more money for letting you know this method and you won't lose anything. I get a percentage of what you make, so if I was not 100% certain that you will make money with this method, I wouldn't bother asking you to become my referral.

Now, let's explain the method. Once you register as an affiliate, you will need to create a "tracker" which you will use to "invite" people to join the casino as players (make sure you create a CPA-Cost Per Action-Tracker for partypoker.com). At that point, I am almost certain that you are think *"What the fuck? Not another referral program e-book. These things do not work."*, but **please** go ahead and read the whole e-book and try the method following exactly my steps and you will be proven wrong.

A PARTY GAMING
AFFILIATE PROGRAM

You are here: » Home » Members Area » Trackers

Trackers Home

The PartyPartners Affiliate program uses unique tracker IDs to track your activity. These track the activity of all real and play money players that you send to our brands.

When you register as a PartyPartners affiliate, you create your first unique tracker ID. This is done when you choose your preferred payment plan, the game that you want to promote, and the incentive that you want to offer your players.

In creating the tracker ID, you ensure that all your referred player and sub-affiliate activity is automatically tracked to you. Tracker IDs also help us calculate your accruals.

Tracker creation
We recommend that you create a distinct Tracker or Bonus Code for each of your promotional activities or web pages, so as to be able to track their impact most effectively.

Tracker URL Wizard
Each tracker ID has a unique identity and reflects activity on that identity. Once a player signs-up using a particular tracker id it becomes easy for you to monitor the players activity.

Tracker details report
This report allows you to keep a tab on all your campaigns with the use of your distinct tracker ids.

[Home](#) | [Terms and Conditions](#) | [Privacy Policy](#) | [Responsible Gaming](#) | [Whistleblowing Policy](#) | [About Us](#) | [Contact Us](#) | [Site map](#)
© 2009 PartyPartners Limited. All rights reserved.

Use those settings when creating a Tracker:

Step 1: Select the brand

☒ Party Brand
☐ Empire brand
☐ Game bookers
☐ WPT

Selecting Party brand lets you track promotions for PartyPoker.com, PartyCasino.com, PartyBingo.com, PartyGammon.com and/or PartyBets.com. The deal you selected in Step 2 determines your payout.

Step 2: Select your payment plan

CPA-Increment (You have 1 trackers under this plan).

Your maximum tracker allocation is **10**. You can create another **6** trackers. [Click here](#) : if you would like to view all your current trackers.
[Please click here to see your payment plans](#)

CPA Increment: With this plan, you will receive an up-front, one-off payment for each real money player you refer. All such payments are made based on how many real money players you have secured for each brand individually, and not all brands combined.
NOTE: Per sign up payment plan (CPA) is not pertinent to PartyBets.com.

Step 3: Select game type

Party Poker

CPA Increment on PartyPoker.com: If up to **10** real money players join each month, we will pay you **\$75** per player. For **11** to **25** real money players join each month, we will pay you **\$100** per player. For **26** or more real money players join each month, we will pay you **\$150** per player.

Step 4: Select Incentive type

Select Currency:
USD US Dollar

Select a currency you would like to market your bonus incentive in.

Select Bonus Incentive:
100% up to \$500 Extra On First Deposit

100% up to \$500 Bonus extra bonus when your referred player makes a minimum deposit of **\$25** at sign up. This bonus is for PartyPoker.com only.

Step 5: Select Tracker Bonus Code

Enter the website where you will be promoting this tracker or describe where and how you will promote this tracker.

☒ Offline and/or Online, using Bonus Code
☐ Online, using tracking URL

Select a Bonus Code: [Check Availability](#)

When you enter your bonus code, make sure there are no spaces. It should contain between three and 10 alphanumeric characters. For example: ABCDEF1234567890

The Party Brands Company will pay you \$75+ (as shown in the image below) for every player that registers through your tracker. The catch is that this player must qualify as a “RMP – Real Money Player” in order for you to get the commission. To qualify as an RMP, a player must:

- Deposit at least \$25 on his first deposit.
- Earn at least 5 partypoints.

Real Money Player ('RMP') Qualifying criteria: Note that you will not receive payments for players that you refer until they qualify as a 'Real Money Player'. The current criteria include:

- Players have to make a minimum cumulative deposit of \$25 and earn 5 PartyPoints by playing real money games across the sites (with exceptions as mentioned below).
- Players making their first deposit through Paysafe and Moneybookers are required to earn 30 PartyPoints to qualify as RMP. (Note: This is applicable to CPA payment option only)
- Players making their first deposit through Webmoney are required to earn 100 PartyPoints for CPA and 15 PartyPoints for MGR to qualify as RMP.
- Players from the below mentioned territories have to make a minimum cumulative deposit of \$25 and earn 250 PartyPoints to qualify as RMP:

Russia	Ukraine	Belarus
Georgia	Latvia	Lithuania

(Note: This is applicable to CPA payment option only)

- In case of Inter Account Transfers, players are required to earn:
 - 15 PartyPoints (For MGR payment option).
 - 100 PartyPoints (For CPA payment option).

We calculate your revenues at the end of every month, and we pay your earnings during the following month.

To keep a record of which affiliate refers which player, we attach a unique identification number to each affiliate's online marketing materials and we link this to your chosen payment plan ('Trackers'). You can assign a different Tracker to each type of payment plan you use, or you can choose to have the same payment plan for all of your Trackers. The choice is yours.

Our Payment plans

CPA payment plan

Payments under this plan are one-off payments for every RMP who signs up to any of our brands except **PartyBets, Gamebookers Bets and Gamebookers Poker**. [Click here to see an example of how we calculate your CPA](#) revenues across our brands.

Payment Plan: CPA Plan

Applicable Brands: PartyPoker, EmpirePoker, WPT Poker, PartyCasino and Gamebookers Casino ONLY

Monthly RMP sign-ups per brand	Payment per RMP acquired
0 - 10	\$75
11 - 25	\$100
26 or more	\$150

Also, the player that sign ups with your Tracker Code, will get a 100% first deposit bonus. This means that if he deposits \$25, then he will get another \$25 in his account (he needs to earn some partypoints to unlock the bonus, but we will cover how to do it without gambling and risking your money).

What we will be doing is:

- 1) Register new accounts as our referrals,
- 2) Play with ourselves and transfer money from one account to the other by winning/losing in poker, so that we earn partypoints (you may need some friends to help you with that, or maybe a second PC).

Do not freak out, I will explain what to do and how to do it thoroughly. There are 2 options here. You can either create only one player account referred by you (**option 1**), or create 6 player accounts referred by you (**option 2**) so that you can play poker. Poker table sizes are 6 and 10 seats, so you need either 6 or 10 accounts if you want to get a table by yourself and not risk losing money to some stranger. Now you are probably wondering what you need to do if you decide to create only 1

account at first. Below, I will describe the steps that you need to follow for EVERY account that you will be making, either you choose option 1 or option 2. When we come to the point, I will describe what to do to earn partypoints if you choose option 1.

Steps you need to follow when creating a new account:

- Sign out from the affiliate account and delete all your cookies.
- Delete all the flash cookies – You can download a firefox add-on that automatically clears your flash cookies when you exit firefox. It is called “Better Privacy”, and you can get it here:
<https://addons.mozilla.org/en-US/firefox/addon/betterprivacy/>
- Get behind a VPN (doesn't matter what country). You can get a good list of free VPNs from my thread here:
<http://www.hackforums.net/showthread.php?tid=1031723>
- Find fresh Socks4 or Socks5 (either will do). Do NOT use a US sock because they do not allow US players in the casino. UK socks are suggested. You can find fresh socks here:
<http://www.xroxy.com/proxy-type-Socks5.htm>

or you can download this program that looks like a VPN but is using socks, and has a lot of UK socks in it:

<http://www.easy-hide-ip.com/>

- Sign up to partypoker.com using your Tracker Bonus Code.
- Create a new Entropay card and load it with \$25+. You can do this before getting under VPN and Socks, for faster browsing, but it does not make any difference when you choose to do it.
- Make a deposit to your newly created account using the Entropay payment deposit method.
- If you chose **option 2**, make 5 more accounts using the same steps. Now you either need friends that can help you, or download multiple browsers, get a different sock on them (only manually, not with easy-hide-ip), login to each account from one browser, join the same table, win/lose money in a circle (example: bet \$1 with every account, and then fold with all except the last one, then repeat with another account, etc.). This way you earn partypoints, so each of the accounts verifies as an RMP, you get credited

\$75 for every account, and you also unlock the bonuses from each account. Once the bonuses are unlocked, gather all the money to one account, and withdraw it to your Entropay card from where you can either withdraw to your own Credit Card, or transfer to new Entropay Cards and reinvest in new accounts.

- If you chose **option 1**, find the game called “Virtual Horse Racing”. This game is very well hidden, because it gives easy partypoints. You cannot find this game in the website. You need to download their client. **IMPORTANT**: *If you download their client, you need to have either socks configured in Internet Explorer, or run the easy-hide-ip program for which I talked before. This is very important, or else your IP address will look like the VPN’s IP, and you don’t want that.* Now that you have downloaded and ran the client, type in the search bar in the casino games “Virtual Racing” and you will find the game. Click to play and you will see that there are 2 options: Greyhounds, and Horses. I suggest playing only on the Greyhounds. You get 1 partypoint for every \$5 that you bet there, so even if you bet all the \$25 that you deposited and lose it all, you still get credited the \$75.

What you will be doing is betting on multiple Greyhounds on the "Place" column. This means that you are betting that this hound will end either first or second. There are 8 hounds and I usually bet on 6 of them. See the odds provided and try to get a balanced outcome, so that you will either lose very little money or win very little money in any case. This way, you get partypoints by staying on your money +- a small amount. I personally always let the two hounds with the lowest odds, without betting. In order to lose all the money, the outcome must be that those two specific hounds came at the two first places, which is almost impossible, but even if it happens, there is no problem as we explained before.

Make sure you follow ALL those steps described above, if you want to get paid and not get banned.

Getting Paid

As you can see, by choosing the option with the more accounts, you can make more money and faster, but it needs larger investment and also is a little hard to manage all the accounts if you don't have friends who can help you. But, either option that you may choose, you can clearly see the opportunity to make big amounts of money.

The casino pays commissions to its affiliates once a month, so you should receive your payment at the first week of the next month from which you generated the commissions. There are various payment methods, and you can once again use Entropay Card as your payment method. This is what I am doing, to stay anonymous, just for better security.

Conclusion

This e-book showed you how to exploit an online casino's system in your advantage and make money from it. If you appreciated what was shown in this e-book and are ready to try out this method and make some money, [Sign up as an affiliate now!](#)
