- 1. Introduction**
- 2. Getting prepared**
- 3. Getting started**
- 4. Places to successfully sell**
- 5. Making your 1st dollars**
- 6. Selling strategies**
- 7. Thank you paragraph + Copyright**

Getting Prepared

1st off before we start making our money we will need to get prepared and get everything we will need on our money making adventure. You will need the following.

1. A PayPal account – This is so you can receive your money

Note: Make sure to link your bank account or add your credit card to your PayPal so you can send/withdraw your money from your PayPal account. It's ok if you don't, but you will not be able to buy anything or send your money to people once you get money.

2. Read the whole eBook!

Note: Make sure to read the whole eBook before you start trying to sell or you may become unsuccessful and you will not pull in as much money as you possibly can!

3. Be dedicated!

Note: Be dedicated to the eBook! Things may be slow at 1st but make sure to give things some time! I will be honest with you. You can't make \$500 on the 1st day using this eBook but you will need to take some time and try different ways to maximize your profits!

4. Help your customers!

Note: If selling things then make sure to help out your customers! Are you going to be selling items to people? Then make sure to answer any questions that they may have so you look like a professional and they will want to buy more!

Getting started!

Here is where you will get started and decide what different ways you will want to use to make all your money from the eBook. There are many different things you can choose from so I will list off different ways you can make money and I will show you how to use those methods effectively in making your money.

1. Pay-Per-Download

Pay-Per-Download is where you will register and upload a virtual item you are selling to a site and it will give you a download link. With this download link you will distribute it and people will follow the download link and when they try to download it, it will ask them to fill out a survey and when they are done with the survey it will allow them to download your virtual item.

Each download that you get from the website you upload your item to will give you a different amount of money. This is not always the fastest way but it is fairly effective and you don't need to put much effort into it. I recommend finding different forums that you think people will appreciate your virtual item and want to download it. Then post your download link that you got from the Pay-Per-Download site and a description and/or pictures of your item and what it does to make it look like your item is amazing and many people will want to download it. A good site for Pay-Per-Download that I would recommend is <http://sharecash.org>.

2. Pay-Per-Click

Pay-Per-Click is another way to increase the amount of money you make. Each time the link is clicked it will take you to site and then redirect you to the site of your choice.

For example:

I could register on a Pay-Per-Click site and make it so it gives me a link that redirects to <http://www.google.com>.

This will usually give \$0.01 - \$0.03 per click. Obviously this will not make you a lot of money but imagine this.

You could register to a PPC site and put in your <http://www.sharecash.org> link so this will happen.

100 people in 1-7 days want to download your virtual item.

100 people AT LEAST CLICK THE LINK! This will give you \$1.00 or so just from people clicking that. Now the people who want to download your item will be redirected to your sharecash link to do a survey and download your item. Now let's say half of those people do a survey and download your virtual item. Let's also say that the site pays around \$0.20 per download. So we will now do the math and see how much we can make in a week at minimum with minimal effort.

100 people click the link = \$1.00

50 people download the item = \$25.00

\$25.00 + \$1.00 = \$26.00 in a week just by posting your virtual item on a website. Now let's say you post your item on 5 websites all with around the same amount of traffic. That is 500 people clicking the link and around 250 people downloading the item.

500 link clicks = \$5.00 or so

250 downloads = \$100.00

Combined is around \$105.00!!! This is a lot of money that you could get with very minimal effort!

Places to successfully sell

There are many different forums and websites you can sell your item on if you don't want to use the sharecash method. All you need to do is find a website that has two things.

- 1. A marketplace section**
- 2. Traffic with a demand for your item**

So with that being said you will need to find some websites with those things. Sometimes this can even be <http://www.ebay.com> or <http://www.craigslist.com>. All you need to do is find demand for your item and you are set on the fast track to making quick online money! And if you want to do both methods but with the same or close to the same item you can upload a limited version of your item so people can have a test version of your item and when they see how great it is they will want to buy your complete version of your item and get the better experience. This way you will make loads of money. Now let's see how much you will make with the combination.

As we discussed earlier you can make around \$105.00 just by uploading the limited version of the item to sharecash. So let's say you find a website that has a marketplace and a good demand for your item. You will want to show your full item and all of the great features it has and then give them the sharecash link to download the limited version. Once they download the limited version you will get around \$0.50 or so and they will see how great your product is and they will want the better version.

So let's say you get 5 sales on your 1st day of selling. And let's say your item is \$10.00. So on top of your \$105.00 that you will already be getting from the limited version you will also get \$50.00 from your item that you are selling. Together you can make around \$155.00 a day just by doing these simple things!

Making your 1st dollars

So to make your 1st dollars you can do a few things. You can either do the sharecash download method and make around \$100.00 and just keep doing that until you want to move on, or you can just do that alone and make a steady amount of money with little to no work.

Or you can just sell a full version of your item to a marketplace with a high demand and make around \$50.00 + a day, depending on how much your item is and how high the quality is of the item and selling strategies which we will get to later.

Selling strategies

There are many good ways to market your item and get maximum traffic to your product and make loads of money that you won't even know what to do with and I will explain to you what the best ways to do this are!

Some good ways to market your item is when you make the title for your thread that you will be advertising your item on is to make the title in **BOLD! This will catch the reader's eye and they will want to**

take a look at your item and there already you will have potential buyers.

Inside your thread where you will be selling your item it will be a good idea to use color and make your text look attractive. Along with making the text look colorful and attractive you should try to layout your text so it will have the “more attractive” text on the top of the page so your reader will keep reading all the way through and have the price at the bottom of the thread. If you have the price at the top of the thread it will make you look desperate to sell your product and it will lure your potential customers away from the thread. Along with all these great tips, make sure to include pictures of the product! Pictures will also keep the reader to look more into buying your product and also make it so you’re more trustworthy to buy from! The last selling strategy I will tell you is to make sure to do one of two things. Either give a review copy of your product to a well trusted member or administrator of the site OR give out the limited version with sharecash so people know it is a real program and you mean business! Along with this, make sure to ask the buyers that buy your product to leave a vouch on your page so more potential buyers see that you are trusted and you will get even more buyers which mean more profit!

Thank you! + Copyright page

I would like to be the 1st to congratulate you on buying my eBook and on all your new money you will be making! A few things I would like to say is that if you leak my eBook out to anybody that did not directly buy my eBook from me then you will be in legal trouble and I will file a scam report on the site you bought my eBook from! (I do keep records of who buys my eBook and what forum they are from, along with their username, contact information, and PayPal email)
