

How to get things for free from Liberty Reserve's Auto-download links.

Author: [n00bz0r](#)

Thank you for purchasing this e-book! You do NOT have any resale rights of this e-book and you may not share this with anyone. The less people that know about this method, the better. If you purchase resale rights, your username will be added in this e-book but you cannot edit its content.

Introduction

Have you noticed that sometimes people sell e-books, or applications with a direct download using Liberty Reserve?

Well, I was one of those people, until I noticed this little trick with which you can get the downloadable goods either for FREE or for as little as \$0.01 LR instead of the whole price.

Now, why is it different and it is not always FREE?

The difference comes from the fact that the seller might have used either a direct LR link for his payment, or a link that passes through an LR store (this is something that the seller creates within his account), where the download link of our product is hidden. In the first case, you can get the product for FREE, while in the second, you have to pay, but I will show you how to pay only \$0.01 instead of the whole amount.

Case #1 : Direct LR link

(No store)

For this example, I will be using my own thread with e-book sales (<http://www.hackforums.net/showthread.php?tid=996609>). When someone clicked “Buy now with LR” as shown below,

The screenshot shows a forum thread on Hackforums.net. The thread title is "[3\$/Autobuy] - n00bz0r's \$3 quality ebooks [LR/PP Autobuy]". The user n00bz0r, a 3-star member, posted on 01-22-2011 at 06:17 PM. The thread has 1,269 posts and was joined in June 2009. The post content includes a detailed description of the ebooks for sale, a list of two items, and links to buy them using LR or PP.

I decided to give out various ebooks that I have acquired over time for \$3 each. Please note that most of these, were sold for \$15+ and most of them are quality ebooks from WSO and not crappy 10-line ebooks. I made this thread so I don't spam the whole place, and everything is found together.

1) **[WSO]EARN AN EXTRA \$700/day for 20 minutes of work! Over 1300 copies sold.**

n00bz0r Wrote:
ebook length: 14 pages

I bought this guide in the past and I found it recently on my hard drive. I did what it said in the past and had quite some success, but I got bored, so I stopped. I have other sources of income now, so I am reselling this guide at a very low price for everyone who wants it. It is still being sold on the warriorforum for \$17.

It has very good reviews by a lot of people, and is one of the most popular ebooks being sold there. Proven success.

Source link with description and vouches:

Use this link to buy for only 3\$ PP:
[Buy now with PP](#)

2) **[WSO]Hide like a ninja from Paypal**

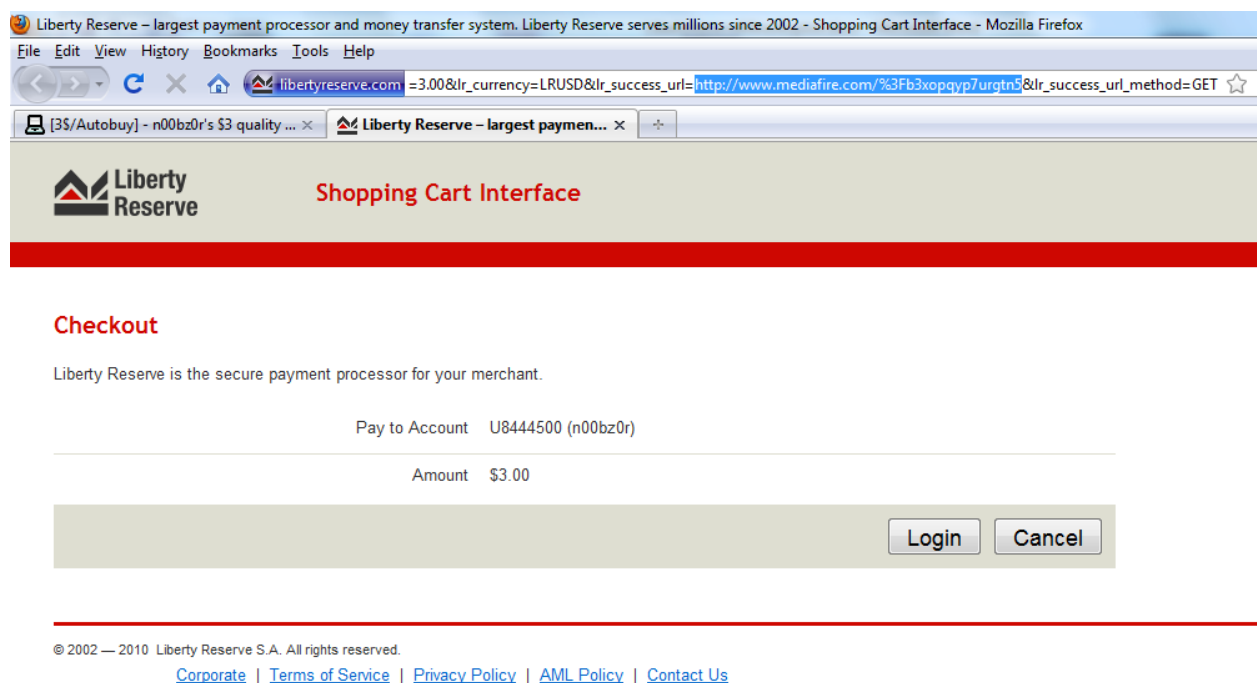

n00bz0r Wrote:
ebook length: 26 pages

This is another guide from the warriorforum. It is quite older and I couldn't find its sales page (the warriorforum does not have a search button), but at the time it was sold, it had quite some vouches. It gives hints and information about what does Paypal use in order to tag accounts, what raises a ref flag, etc. Here are the contents:

it would take him to a page like the one showed below:

Now, take a careful look at the link. There is a field named “lr_success_url”. We copy what is next to it until we find the “&” symbol.

We are almost done, but if you copy and paste the link to a new tab, you will see that it is wrong. You need to replace the selected characters with “?” as shown below:

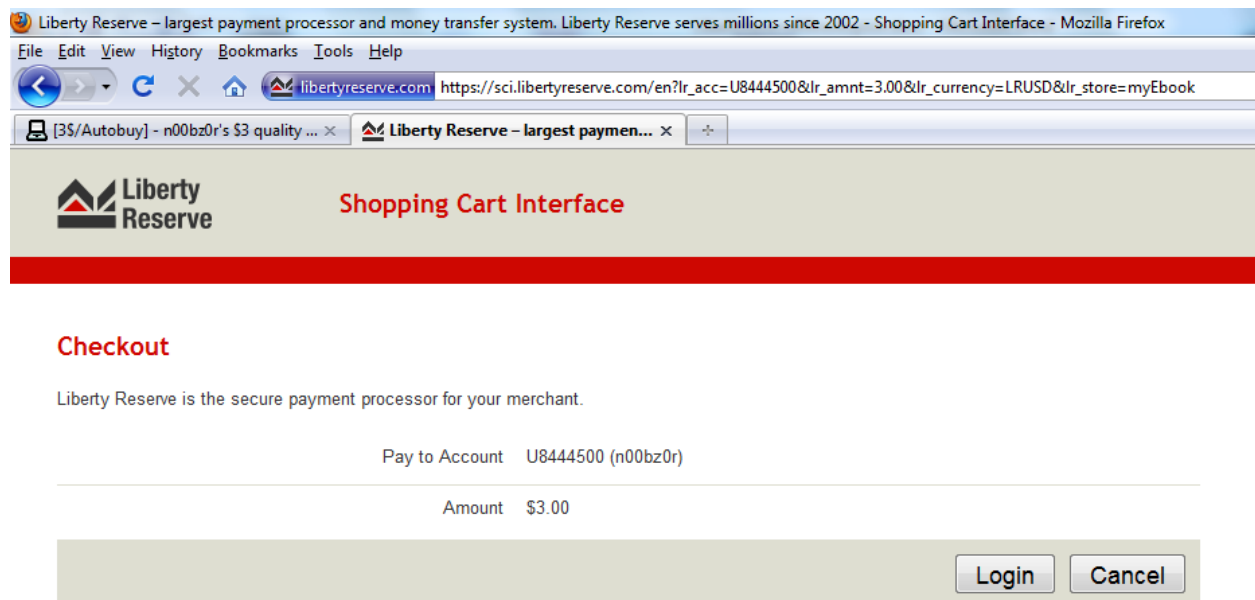

The new link is working and takes us to the download page:

Case #2 : Link with Store

In this case, the seller has used a store in order to make his link and the download page is included inside the store and not visible in the link, as it was on case #1. See below:

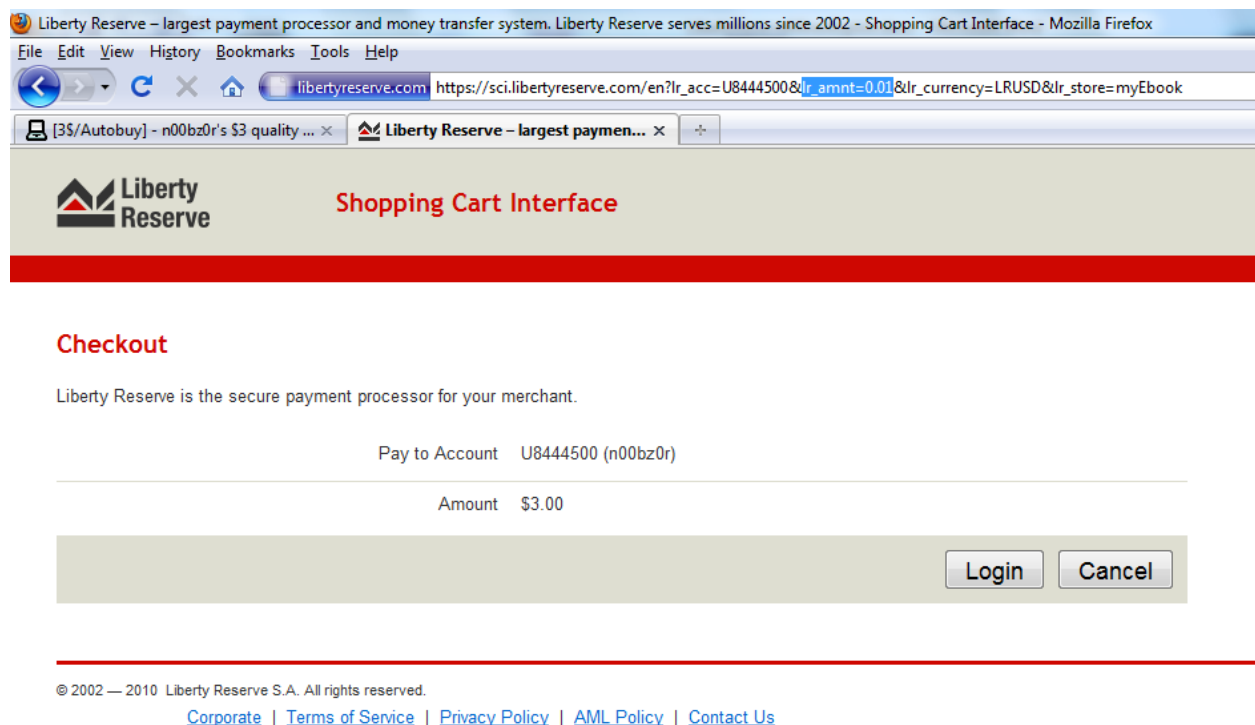

As you can see in the image above, the download page, is not included in the link like before.

So what do we do now to get our product?

We are going to get the product not for FREE this time, but for only \$0.01 (meaning almost free).

In this case, we must locate in the link the variable “lr_amnt”. As you see in the image above, the value of this variable is the value that we need to pay (\$3).

Now, we can change this value to whatever we want (in that case \$0.01) like shown in the image below.

If you do what is described above and hit “enter”, you will get a page like the one below:

Checkout
