

This is new brand of pay per download. If you know about Sharecash and Ziddu, you might be love to try this program. This program was called [Files-Cashout](#). This is new program i know today. Seems like this program already run well. What you must know about this program?

You will get paid for the majority of the downloads that you get. You will not receive payments for every download because either the user has entered fraudulent data into the offer field so the payment will be reversed on our side or if we do not have any offers available for the users location. To me, just promote and keep promote. I hope some of you know which files to upload at this program to increasing your ratio of download files.

[Files-Cashout](#) currently offer payment via Paypal & Moneybookers. If you cannot accept these payment methods then you can email us when you are ready to receive a payment and we can also send via Cheque. Mininum cheque payment is \$100. Mininum payment via Paypal or Moneybookers is just \$15. Like others program, you need to wait for 30 days in order to get paid. Seems really late. I hope this program can do something about that.

Before you forget, Each file may be up to 200 megabytes in size but you have unlimited storage space available. So, use it wisely. These surveys pay you anywhere between \$0.30 to \$0.70 per fillout per unique IP address and sometimes even more. We also pay you 10% referral commissions so if you refer someone to the site that earns \$1000 we will pay YOU \$100!!!
