

How to make money with HYIPs without even investing to them

Written by miimiimiimii 2010

Now everyone knows what HYIPs are; High Yield Investment Programs. And I really hope that most of you also know that 99% of them are pure scam. Sooner or later they are just going to take your cash and run. That's how Pontzi-schemes work - People who join later fund the money paid to people who joined earlier. And as you can imagine, the source for new members gets dry eventually. That is the time when they stop paying and run.

If you have ever Googled word HYIP, you have noticed that there are loads of forums related to them. And if you have taken a closer look to the forums, you may have noticed that most of the posters there are so called "HYIP monitors". They are websites that claim to be honest and monitoring on what HYIPs you should invest to. The truth here is that most HYIPs only pay to these monitor sites and no one else! They WANT them to post screenshots of their payments to forums so more people will invest to their programs. And when someone who is NOT a monitoring site owner deposits his/her money there... Bang, it's gone. You can spend your days writing to HYIP-support and posting to forums that you did not get paid and they took your money. But no one cares. Your comments here and there are devoured by the monitoring site's comments that they got paid. And those are what the big audience will see. So these monitoring sites are actually in the same scheme with HYIP programs, just operating on a bit different level. HYIPs want as much payout proof-posts as possible to overtake the non-paying users's posts. And general part of the people who read those forums believe the monitor admins post and think that "ok, they got paid so this looks legit. I will invest here.". And that's how HYIPs get their victims.

And now we come to the money-making part of this guide: HYIPs don't only make payouts to these monitoring sites, **THEY ACTUALLY PAY FOR THEM.** They don't need to make any deposits to any programs; Just register to a HYIP with a username

that indicates to a monitoring site, i.e. besthyipsadmin etc., and most of the programs will automatically send money to your account, usually around 10\$ to 30\$ dollars. And that's without even any contact to them. Simple as that. That is the simplest way to execute this method. But of course if you just randomly put out someone else's websites name as your username, you will get busted from time to time and get your account locked. But who cares, there's basically endless amounts of HYIP-sites and new ones come every day. And you haven't invest a penny of your own, so everything you have gotten out is **FREE MONEY**. I still recommend using sales letter (see below) with this method to get more cash from programs.

If you want to take things to a next level and make lots more cash, here's what to do:

1. Register a domain referring to monitoring HYIP programs. Use your imagination
2. Install a HYIP-monitoring script. If you don't want to buy one or don't know where to get it for free, simply a forum is also enough.
3. Many sites have a minimum deposit of 1\$. I recommend making investments to a minimum of 10 sites if you want your site to have some content from the start. Not mandatory if you don't want to risk your money, you can also just make topics to your forum about different programs. If you use a forum, create users by yourself and run a traffic bot for a while so it looks popular.
4. Go to some of the biggest HYIP related forums, you will easily find these from Google. DreamTeamMoney and TalkGold are two of the biggest forums.
5. Go to the part of the forum where there is topics of currently running and new HYIPs. Now you have found a list of all currently running HYIPs.
6. Send "sales letters" as much as you can using their contact-form
7. New, just started HYIPs are the best target. I get sales on approx. 5 out of 10 new programs that have run less than 2 days. But also do the longer ran ones, sending a letter takes only less than 30 seconds and you get a sales rate of 5%-10% easily. Just adjust your letter, prices, site lay-out if you don't get responses.

Sales letters for this purpose are easy to write. Just offer banner to your site and payout proof post to 20,30 or something HYIP forums after every withdrawal (very few actually bother to check if you have done this). A good price for this is around 25\$ to 75\$ dollars, depending on your site's traffic, design, amount of members etc. crucial. Start with less and go up from there as you gain "clients" and your site has regular visitors. Accept payment as bonus cash to their program, they are much more willing to do this than send you money to PayPal, Liberty Reserve etc. Also tell in your sales letter that you won't withdraw the bonus principal, only the interest. Those are the main things the HYIP adins want to hear. Keep your letter simple and short, most of the people running these programs are from Russia, South America, China etc. and don't speak English too well.

How much you make with this program is up to you. But let's do some calculations: If you have 20 programs as your client (should get this in less than a week) and each have given you 25\$ as a "monitoring bonus" + from banner, you have a total of 500\$. Depending on the investment plans the HYIPs you have as your clients have, **you will be withdrawing about 200\$-400\$ of interests EVERY WEEK.** And if you have 70-100 sites as your client after a month, do the calculation. And keep in mind that source of clients is endless, lots of ne HYIPs start every day.
