

# Setting up your Paypal account

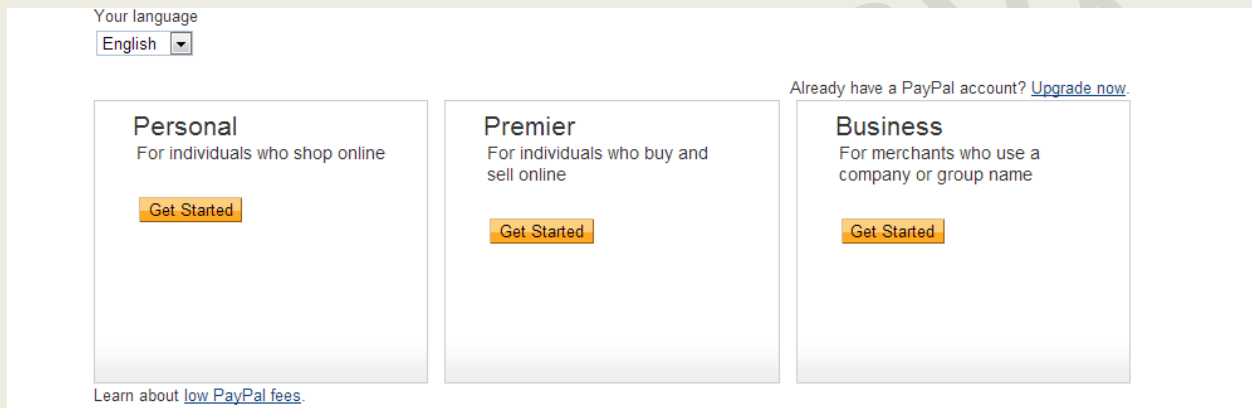

Evanc Official

**For this method you will need;**

**a PayPal (Active and Verified is better, but not required)**

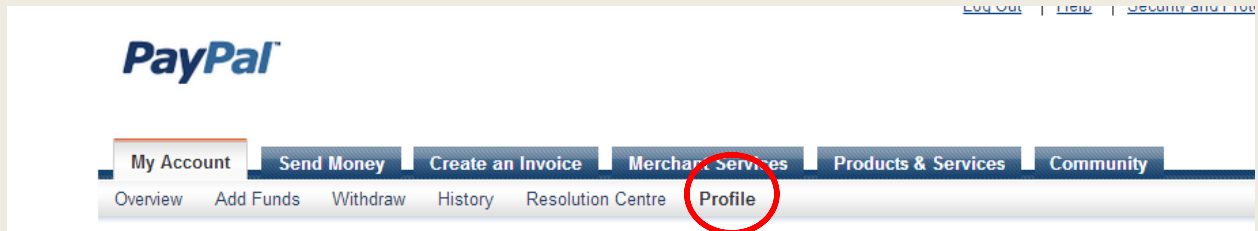

**A paypal account is required for this method since we will be using ebay. If you have a previous account, I suggest creating a new one for this method.**

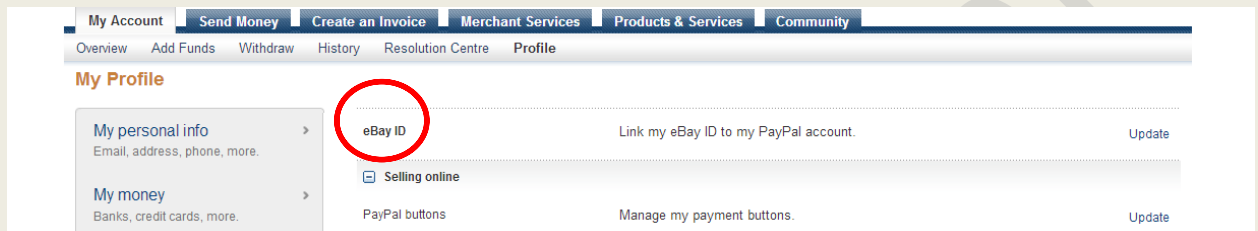

**Make a PayPal premier account. Except your country, fake all of your addresses and do not add a bank or a credit card. Do not make up a random address; PayPal will check if your address is real. For your phone number, put in your real phone or you can get one online if you don't want to use your real information (you will need a valid phone number later for ebay).**

Do this after you have sign up on ebay and link your paypal account.

Click on Profile

And link your ebay here. You will need to do this step to confirm your ebay account.
