

Make insane money with

By Martdin Jenkins

What is Sharecash?

Sharecash is an online file hosting service (such as Rapidshare or Megaupload). Yet Sharecash.org has something that Rapidshare or Megaupload don't offer: they pay you every time someone downloads your file! It sounds truly amazing doesn't it? But then how does Sharecash make money? Well there is a tiny catch: every time someone wants to download your file they must fill in a survey. If that person doesn't want to do that, they can buy a premium account and they get to skip the surveys.

How much do I earn?

Sharecash.org will pay you at least \$0.40 for every download within the United States, United Kingdom, Canada, or Australia. For international downloads you will receive at least \$0.25 per download.

Some of you may think: WOW! 40 cents every time someone downloads a file!

And others may think: Hmmm 40 cents? That's quite little...

For starters 40 cents is the MINIMUM you will get for a download within the above mentioned countries. Second of all in comparison to other sites that's quite amazing! Most sites similar to Sharecash will pay \$10 for 1000 downloads. Which means:

- $\$10/1000 = 1$ cent per download

-You will not even get your money until the 1000th download is made.

The above shows you how great Sharecash really is. But now let's turn the above stats into a scenario in which you're using Sharecash.

-1000 downloads = $1000 \times \$0.40 = \$400!$

-You can cashout anything above \$10, so you get your money when you want!

Now the above is how much you earn from downloads. There are 2 more ways you can make money with sharecash!

When someone buys a premium account (after using your link) you will get 30% of the money they spent on it! But that is not necessarily a good thing (more on why that is later)!

The third way for you to make money is referring people to sharecash. When you refer someone you will get 10% of what they earn (that does not mean they will get 90% of the profits, it means that you as a referrer will get a bonus of 10% of whatever your referred user earns!) So the more you refer the more money you get!

To conclude, there are 3 ways to make money using sharecash.org:

- Downloads
- Premium Accounts
- Affiliates

Lets start making insane money!

Firstly you need to set up an account! Remember when I said that if I were to refer someone I would get a 10% bonus of what ever that person earned? Well why not implement this now! Using the link below sign up for a Sharecash.Org account:

<http://sharecash.org/index.php?ref=396338>

Yes, I know it is a referral link, but this is the least you can do to help me out because I am providing you great information with my awesome eBook.

When clicking the above link you will be taken to the sharecash home page where the register link is located (look fig 1). Click register and you will be taken to the signup page.

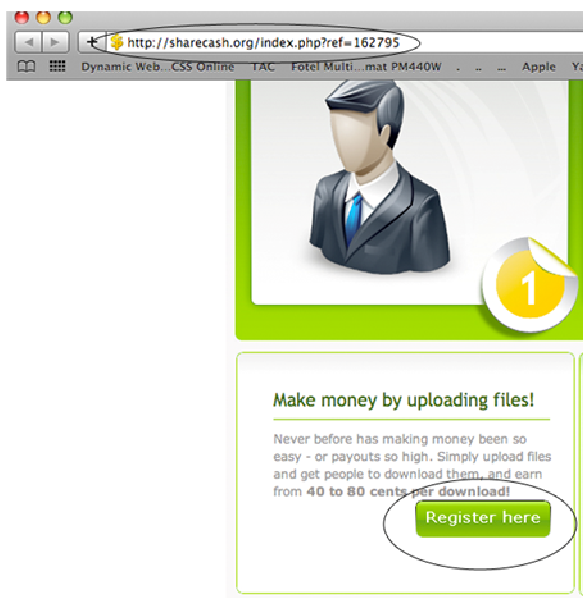

Fig 1

To register click the register here button.

Remember to check if you're using my affiliate link so I can check up on your progress and so that we can communicate!

Please note that using my link is a great advantage as it costs you nothing and I can personally help you if you are having problems!

Fig 2

Fill in all the fields with real info!

This shows sharecash you are a serious member and they will not ever consider holding your payment or anything like that!

Once you have signed up and confirmed all that you need to confirm it's time to have a look at your control panel:

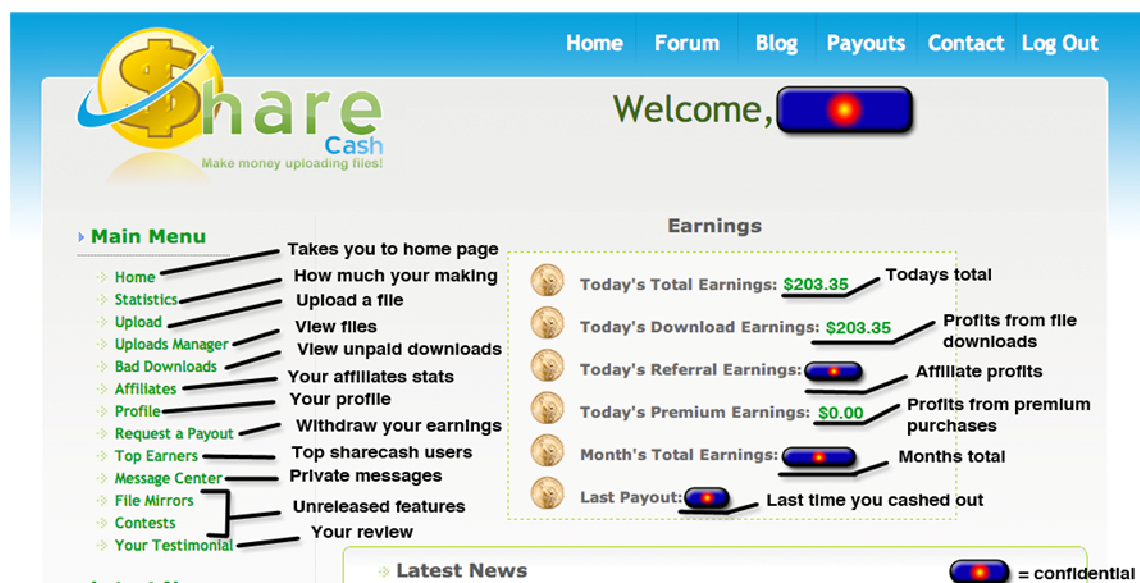

Fig 3: Sharecash control panel with labels.

Fig 3 tells you briefly where every link takes you. From the above the most important are: statistics, upload manager, affiliates.

You are now ready and set to make money!

Techniques

In this e-book we will be looking at 5 top techniques to make insane money with Sharecash.

The first technique is called the “torrent trick” and it is very simple yet probably the most effective. This method is called the torrent trick not because we are tricking people into a fake download: we are tricking people legally:

The fundamental idea of this strategy is to make P2P users download torrents NOT with the file they are looking for but with a text file with your Sharecash download link to the file they are looking for.

This method is limited to files that are no larger than 200 mb (which is the maximum file size on sharecash). But the restriction is not bad, as the user must therefore download 2 parts of the file earning you 2 times as much. Some may argue that the person will not want to fill in 2 surveys but there is a way to trick the person into doing that. All you have to do is put the download link to the second part of the file in an archive with the first file part and inform the downloader that there is a second part only after he downloaded the first part: as the person already downloaded half the file they may as well do the other half.

This is how you execute this method: first find a popular file on a torrent website (such as www.thepiratebay.org) and download it. Then upload it to your sharecash and get the download link. After you have done that place the download link (and password if you want) in a .txt file. Then create a torrent for your txt file and upload it to the torrent site. If you are not sure how to create a torrent please visit

<http://www.sharecashguide.com/torrent.php> .

Once you have done that upload your torrent to your preferred torrent site and watch the money flow into your sharecash account!

The second method is called the forum method. It is also insanely amazing but with this method, the more you work on it the more you will earn. The idea behind this is not to spam your link on forums and hope for downloads, that never works. People will only download your file if they want it. This technique has two sub techniques to it. The first way is to find highly populated forums and post something very related.

Here is an example: lets say we have a highly populated guitar forum. The idea is to offer a download to a file that everyone on the forum can use. Every guitarist can use some tips. Google “guitar tips e-book” and find something you like. Then upload it to sharecash and start a thread on the forum. You have to mention its free and mention that it’s a must have even for professionals. And that’s it! Watch how many people download your file! It’s insane!

The other sub technique may cost you a few bucks but is far more effective. Lets have an example: we’re still on our guitar forum and there is a user with 20,000 posts. This means his posts are basically ALL over the forum. Every user has a signature which is a set picture/text at the bottom of every of the users posts. All you have to do is offer that user for example \$20/month to rent his signature space. In that signature space you will have a few of your sharecash download links with related downloads (such as the mentioned guitar tips) that will be displayed under every one of that users posts. That means that your download links are everywhere for everyone to see, click and make you money. This is the most profitable technique but it may cost you a little to rent the signature space.

The third way to make insane money is free advertising of your links using for eg. Youtube.

There are many ways you can attempt this. One way is to literally take a real advert of a product (that you have uploaded to sharecash of course) and just put your download link in the description. This is very effective especially if your video is the only one there for that product (but that is extremely rare).

Another way to take advantage of youtube is to make your own advert for something your supplying a download link for. You can either review the product or film your own (if its funny it helps) advert for the product and just supply the link.

A third way to advertise your links via youtube is to reply to videos. Find videos that have something to do with your download and just comment on the videos posting your download link.

A fourth way is similar to the second forum method. Pay someone who has a popular video to post your download link in his or her video. If that video happens to have something to do with your download this option is a must!

The fourth technique is 18+. The most downloaded thing on the Internet is porn. All you have to do is download a set of pornography pictures or a video and upload it to sharecash and just post the link on forums or message boards.

Remember not to call the file something obviously pornographical as sharecash doesn't always like porn!

The fifth technique is a bit of a gamble but if it works that's your best shot. I personally use this technique many times at

once. The idea behind this is to buy traffic that will then earn you more money than you spend on traffic. Let's say you buy a 10,000 traffic package on Full Traffic:

http://www.sharecashguide.com/Full_Traffic.php

for \$15. Lets say every click downloads your file, that's 10 000 x 40 cents = 400 000 cents = \$4000! So you make \$4000-\$15= \$3985. Now that is some profit!

Tips

NEVER violate sharecash rules. If you do one thing wrong and they ban your account you will lose all your profits! This also applies to trying to cheat their system with proxies etc.

This does not work as it has been patched a while back. Sharecash has also invested in a fraud detection system so beware!

IMPORTANT: You may think that when someone buys a premium account you make great money and it's good. Well unfortunately that's not true... When someone buys a premium for eg. \$10 you get a rubbish \$1. Which is the cost of 2.5 downloads. If the downloader has a premium account you DO NOT get paid for the download! So if you're assuming that that specific person will download only once, its good to try to make him get a premium account (from your link) as you get \$1. But if that person is going to be downloading many of your files and he buys a premium, you're actually getting less as you get the \$1 when you could be getting \$0.40 per download. Think about that!

You are now ready to make insane
money with Sharecash!

Good Luck!
