

The Ultimate Guide to Making Money and Getting Referrals Using Youtube

Introduction:

To be honest with you I am sick and tired of seeing loads of guides and eBooks promising that they can get you thousands of referrals and making you loads of cash for doing next to nothing, and all of them making you and bringing you **nothing**! So I decided to write a simple to follow, noob-friendly guide to getting yourself those wanted referrals and that wanted cash! Which will get you good results no matter what your ability! And with **NO** investments! This guide will show you how to get around 100+ referrals within 1 month and how to make over \$150 a month from downloads. All automatically with youtube. The amount of money and referrals you can get using this method is endless! And the best thing is this method will **ALWAYS** work!

Okay well enough about that lets get on with the guide shall we. I know you are all eger to know the method and to start seeing the results within just a few hours!

Contents:

Page 1: Introduction and Brief

Page 2: The Method

Page 3: Step-by-step Explanation

Page 4: My Tips on More Downloads (Investments Needed)

Ok lets get down to business, before we start though I would like to say that this E-Book is 100% written and owned by GetFreeSubs.com anyone caught trying to resell this guide without my resell rights will be reported and paypal will be noticed of your actions and they will take action upon your account.

Brief:

I am going to be showing you my method on how to get referrals and make money at the same time using youtube with next to no time being spent on doing so. There are a few things you are going to need before we get started and they are as followed.

- 1: A brain - This is always needed.
- 2: A little bit of knowledge - This is helpful.
- 3: A Youtube Account - You will know why shortly.

- 4: Visual Basic 2008 Express Addition - You will need this for the method.
Download it from <http://www.microsoft.com/express/Windows/>
- 5: A Sharecash and/or an CPAlead account - This is where the money will come from. If you don't already have an account on either or the sites you can signup below.
Sharecash - <http://sharecash.org/index.php?ref=15680>
CPAlead - <http://www.cpalead.com/apply.php?ref=47190>
- 6: An account to gain referrals - Im guessing you are all members of a site which you already wish to gain referrals from. I suggest sites like Cashle.com or Rewards1.com.

The Method!

Ok first of all you are going to need to make a fake program or a fake tool depending on how good you are at coding Visual Basic 2008, I personally make fake programs for example here is my VERY basic and nooby "Nexon Cash/Game Card Generator" <http://www.youtube.com/watch?v=HkJg3sqe4Oc>

As you can see the video quality is very poor and so the program, but I still got 200+ downloads within 2 weeks of uploading this video, and I have gotten well over 1000 referrals from just this video! It just goes to show how people will download almost anything! Anyway back on to business, you are going to need to make your own program like my Nexon Cash/Game Card Generator in Visual Basic 2008. If you know how Visual Basics works and you know you can make a nice looking fake generator or something just skip onto the next paragraph, if not keep reading. Ok so before you just jump to making your program you will need to think about what type of program it is that you are going to make. Try and be unique with your ideas, try and do something new, maybe look up a few new, growing sites and make a fake generator or bot for them. Really think about it because if you just copy something that has already been done hundreds of times then you aren't going to get so many hits, views or downloads therefore you won't make as much profit or get as many referrals so the idea is a very important component .

Step-By-Step Explanation

Once you have your idea ready its time to start making your program. Open up Visual Basic 2008 and Create a new project (name it whatever you want). Now its time to start adding a few features to your project, here are two videos to help you out. If you need to know how to change the files icon, background image ect just search for it on youtube.

Here are the two simple tuts I followed to get myself started off (If links are dead simply youtube search for the feature you want to add to the fake program)

<http://www.youtube.com/watch?v=1MUDap8gzXU>

<http://www.youtube.com/watch?v=LW9ZHjqpU6Q>

Ok, the two key things you are going to need to add are a simple "Generate"(or whatever you have chosen to make) button which when clicked it will make a message box come up saying something like "To Generate Keys Register Your Account", then add a "Link Label" saying something along the lines of "Register Your Account Here" which when clicked will open a message box saying for e.g "To Register Your Account Signup At *Site Name Here* And Complete 2 Offers". When "ok" is clicked on the message box their default browser will open your referral

link to a site of your choice (again look on youtube for tuts on howto do this).

And that is pretty much how you are going to gain your referrals.

You can try and make the program look as professional as you like, the more programs you make the better you will become at it.

Money Making.

This is the easiest and shortest part of the guide, all you have to do is upload your completed project (program) to either Sharecash or CPAlead.

The download link will be the link used in the info tab of your youtube video. If you don't know how to do this with CPAlead simply google "How to make a download widget for cpalead"

You will be making a good amount of money from each download. I make an average of \$.50 per download and I get quite a few downloads per day from a few videos automatically. The money you will make from downloads is amazing. Also you are going to be getting masses of referrals on the site you chose. This is going to make you even more money or get you **free** games ect.

The Youtube Video.

It's time to make your video to upload to youtube. If you are good at making videos and you know what you are doing there is no need to read on, you are finished! Best of luck. For the rest of you here is a brief guide on howto record and upload your youtube video.

You are going to need something to record your screen with to show off your program. I suggest the following program.

Camtasia Studio 6 - <http://bit.ly/cNK2SJ> (Download link)

Now all you have to do is make a video showing off your program, be creative use video editing software, try and make the program seem legit, post "proof" of it working. Just try different things until you find what looks/works best for you. If you have taken a look at my videos on youtube you would have realized that my videos aren't very good, and yet still I am getting loads of views/downloads and referrals, so think how well you would do if you spend time and made the programs and videos to a very high standard, you would be making some serious cash!

Remember to write a good description for the video and make sure to include your download link from Sharecash or EnviroFILE, and a virus scan from VirusTotal to insure people its not a virus. Also make sure you have a few good 'tags' for your video so more people will find it.

Before I finish this Ebook here is a small tip on getting more downloads and more views to your video/s.

Simply head over to a forum which you are a member of and ask members for comments and rates on your videos, or you can look online for a few programs/bots to do this for you (beware of fake programs and viruses) or you can simply ask your friends to comment ect for you.

You are going to need these comments and rates to attract more people to view and download your programs.

My Tips.

Tip 1: Simply invest a little cash into buying comments, rates and likes.

People sell these for very cheap! So it's worth buying them to help you get downloads and to help your video go to page one of the youtube search!

Tip 2: Buy views! Look on forums for people selling "500 views to your video per day!" Make sure they have good feedback before buying though. From experience I have spent \$5 on one video to get views. And within 7 days I made back \$50!

Tip 3: Make loads of different videos and fake programs. Don't just make one program and video and just hope that, that one video will make you the money. Make more and more fake programs and videos to get yourself more and more money!

Tip 4: Tags. Make sure your video has loads of tags and make sure they include keywords for your program. So that when people are searching for the program your video comes up first.

Thankyou For Downloading This Guide I Hope You Enjoyed It And I Wish You The Best Of Luck With Everything!

If You Have Any Questions Please Email me. My email is admin@getfreesubs.com

Feedback Is Needed So Please Contact me telling me what you think about the guide and what you think should be added.

Also Please Take Into Consideration That This Is My First Ebook. So it might not be amazing.
