

TEOTIHUACÁN – CITY of GOD or GODS?

Section IV, Part 12 – The Many Moons of Teotihuacán – (F)

By Doug Krieger

Giants in the Land?

Viewing the “Celestial Promenade” – so grossly misnamed as the “Avenue of the Dead” by the Aztecs – and tragically ascribed to the Mayans as their “calendrical masterpiece” – and studied by diligent metrologists from around the world...yet are its secrets heretofore undisclosed for man would “worship and serve the creature more than the Creator” and thus, these artifacts and monuments of antiquity would for centuries fall upon a more corruptible and defiling interpretation.

Notwithstanding, those ardent discrepancies are vanishing and a new day, the beginning of the everlasting cycle ensues – Life out of Death – O glorious resurrection...for as the restorative work of the Mexican people persists, yet is their quest and preservation of this wondrous site prepared to give of her unlimited treasures to humankind at the close of this, the final episode of man’s desire to be “all that you can be” – yes, their quest for godhood...even *Teotihuacán*, whose name belies the inexhaustibly distorted desire to be God without God! Could it be that this Mayan greeting is sourced in this desire: *Lak’ech Ala K’in* “I am you, and you are me.” (Source [here](#).)

This most agonizing reappraisal of Teotihuacán’s disclosures should rock the mystical world of the occult and of devils and demons who for centuries promulgated heresies from its once pristine environs which were originally designed to reflect the Dimensions of Paradise – not the [Neolithic](#) subterfuge of a lesser species, alien to all that occupied the Divine Mind of yore ... for the Almighty had placed within the heart of all men that “Light which gives light to every man coming into the world” but “men loved darkness rather than light” and would not come to the Light, that (his) their “deeds be exposed” ([John 1:9; 3:19](#)) but relished THE LIE...”For God knows that in the day you eat of it your eyes will be opened, and you will be like God, knowing good and evil” ([Genesis 3:5](#)).

Thus it became known as *Teotihuacán* – the place where men become gods...“where humans awaken from their illusions and realize their Divinity,” ...the place where some affirm the Quinametzin (Náhuatl) – the Giants – made their Neolithic mark...

“The construction of Teotihuacán was attributed to the Quinametzin Giants; Quinametzin (Náhuatl), a race of giants who, *legend says*, populated the world during the previous era and whose survivors were hidden in those days. ‘the Quinametzin were created during the era of the *Sun of Rain* and its ruler was Tlaloc. His rule ended when Quetzalcoatl made *rain fire* and the Quinametzin burned to death.’ At the arrival of the Spaniards, the Tlaxcalteca said that they

fought against the last Giant before their arrival. This ‘Giant’ that in their **mythology** constructed Cholula and Teotihuacán, resembles the Maya God Itzamná, ‘the god that could fly.’

“For many years, archaeologists believed it [Teotihuacán] was built by the Toltec civilization, based on the colonial text ‘[The Florentine Codex](#)’, which attributed the site to them. However, that was what the Spanish wanted to record, not the records of the Aztec and Tlaxcalteca. The Maya also recorded in their Codex the era where the Giants lived on Mother Earth. The ‘Toltec’, which in Náhuatl means ‘craftsman of the highest level or knowledge’, flourished centuries after Teotihuacán. Therefore ***the people could not have been the city's founders. It is still a mystery who built this incredible city***, but every day, new discoveries are changing our books.” (My emphases) ([Teotihuacán, “The Place Where Men Become Gods,”](#))

Yes, it is the full intent of this author to submit these “new [metrological] discoveries” in a bold attempt to change some exceedingly confusing and spurious literature deemed nigh irreparably prejudiced – thus, you may accuse me of a noble, though exceedingly futile, effort to correct a legacy of delusion and distortion...but I shall proceed with utter abandon knowing this...

They’ve had their day – this day belongs to men and women of faith who believe that these “giants” are but the Nephilim (i.e., the “fallen mighty ones”) – demigods who corrupted the original intent of this Sacred Expression and who themselves were “cast down to Tartarus and delivered them into chains of darkness, to be reserved for judgment” for “the angels who did not keep their own domain, but left their own abode, He has reserved in everlasting chains under darkness for the judgment of the great day” ([I Peter 2:4](#); [Jude 6](#)).

There most certainly is an explanation as to what “went down at Teotihuacán” – and, for that matter through the world “that then was.” People of faith who adhere to the Biblical rendition of these so-called mythological understandings attest to the “Scriptural” account as “truer than fiction” in that there was what is known as the “antediluvian earth” accounting for a myriad of unexplainable phenomena encompassing the globe.

To ascribe to the historicity of such is not to negate the intervention of alleged “aliens” who once walked the earth – our explanation of these matters is far more legitimate than “men are from Mars and women are from Venus” – and so it is that folks like Thomas Horn will occasionally appear on Art Bell’s program (e.g.,

[Stargate and Transhumanism](#)) and feel completely comfortable in that environment (somehow)...but these “world mysteries” are rapaciously unraveling as we approach the end of the age...”But as the days of Noah were, so also will the coming of the son of Man be” ([Matthew 24:37](#))...and this cannot be construed to be indifference to the coming of the Son of Man, but of that “environment” to which Horn and [others](#) warn concerning the Latter Days.

The Moons of Teotihuacán in Diagram Format

If Teotihuacán’s Sacred District represents a cosmological reality – then it can and should be expressed by a geometric construct.

Immediately below is what we shall, for lack of a better name/phrase, dub the ***Teotihuacán New Jerusalem Diagram and Her Moons*** - with her many moons – each with a diameter of 1,320’ – 12 surrounding her exterior; 12 under the direct influence of the Magan David/hexagon; four in her inner circle and one in her innermost circle.

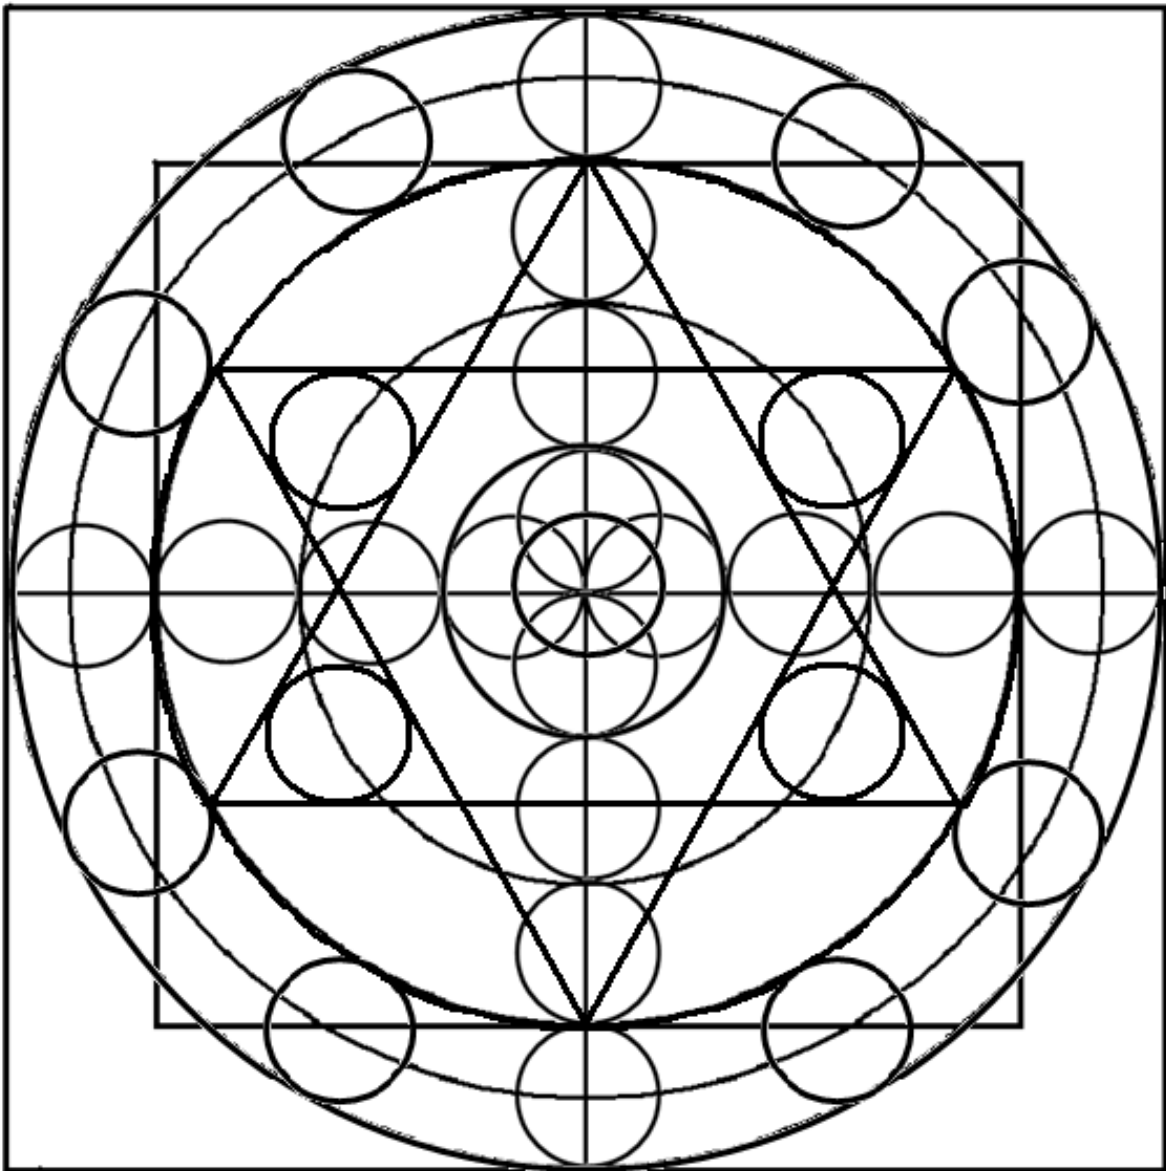

There are six concentric larger circles with the first one being in the innermost forming a four-leaf clover in appearance adjoining four vesica piscis – that circle is the very Throne Room of The Almighty with the Lamb upon the Throne – the immediate four circles represent the **FOUR LIVING CREATURES BEFORE THE THRONE** – together their diameters equal to $4 * 1,320' = 5,280'$ or 1 Imperial Mile wherein the Mile dominates the entire Teotihuacán New Jerusalem Diagram and Her Moons.

Another – the third concentric circle perimeter “touches” either the perimeter or dissects 12 Teotihuacán Moons – four on the left and four on the right and 2 above and 2 below and all between the second and fourth concentric circles.

These are directly under the influence of the Star of David and constitute the Teotihuacán New Jerusalem Diagram’s Jewish component – the 12 Patriarchs of Israel as found in the Revelation – the 12 Gates of the Holy City.

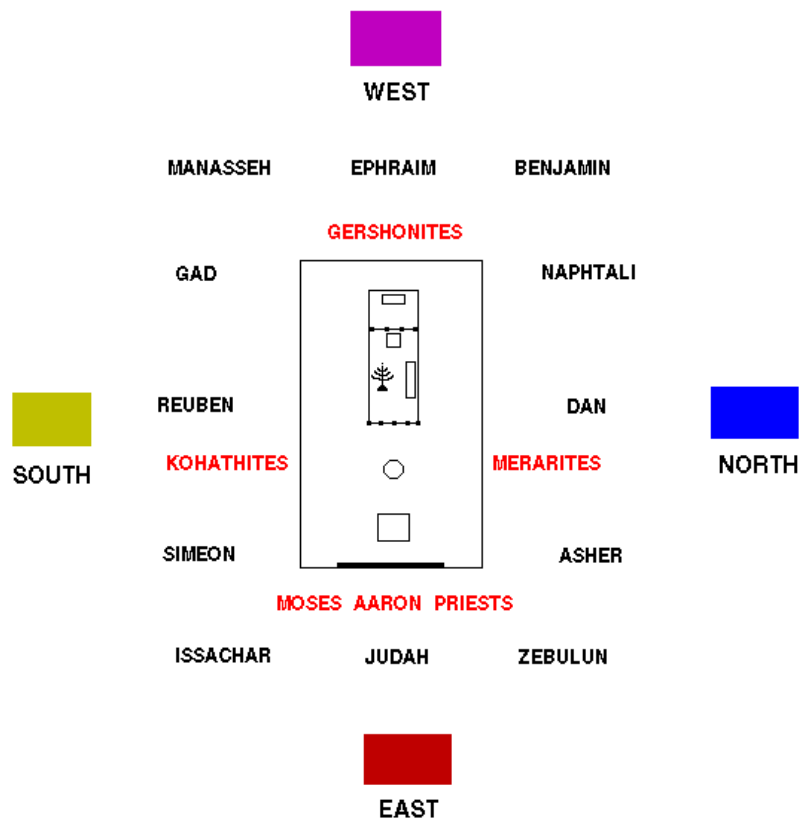

The large square which encloses the fourth concentric circle has the diameter of the Earth at 7,920 miles and the length of the Teotihuacán “Holy District” - which district is 7,920’ in length and 2,640’ in width having the geometric capacity to be divided at its Axis known as the Avenue of the Dead into two halves each having a dimension of 1,320’ x 7,920’ and then each of these halves is subsequently subdivided into six equal dimensions of 1,320’ x 1,320’ for a total of 12 each

1,320' x 1,320' squares whose "circle within the square" have a diameter of 1,320' – therefore 12 such Teotihuacán Moons. Together, the twelve orbiting the Earth constitute 12 and the 12 on the interior between the fourth and the second concentric circle constitute 12 and together $12 + 12 = 24$ and represent the 24 Elders of the New Jerusalem or the 12 Gates (Israel) and the 12 Foundations (the Church) – Israel and the Church. The third concentric circle which touches the 12 slices through four of the 1,320' diameter Moons and touches or "goes between" 8 others for a total of 12 as in $4 + 8 = 12$.

The four “moons” sliced are representative of the four major tribes placed around the Tabernacle in the Wilderness in a North, East, South and West manner; whereas the 12 Teotihuacán moons on her periphery are the closer to the heavens and are representative of the 12 Apostles of the Lamb – the 12 foundations of the Holy City – the Church, the Pillar and Ground of the Truth.

These are “clustered around” the 12 Tribes/Patriarchs of Israel and match them in their resemblance but remain distinct as the foundations of the Holy City are “hidden in Messiah, the Anointed One, the Christ” and contend with “principalities and powers in *heavenly places*” for they have a “heavenly calling” to which they are not disobedient; whereas Israel’s gates face four directions – three to the North, three to the East, three to the South and three to the West – through them the nations may enter into the City for Israel’s testimony is to the Earth and that of the Church to the heavens – yet the City descends to the Earth from the heavens and participates as the link between both spheres.

There are TWO large squares – the one having the dimensions of the Earth on all four sides of 7,920 miles (as does the New Jerusalem Diagram) – which dimension is likewise the one-edge dimension of the actual New Jerusalem ([Revelation 21:16-17](#)) of 7,920 (as in 12,000 furlongs at 660' per furlong = 7,920,000'/5,280' = 1,500 miles on one of her 12 edges * 12 edges = 18,000 miles on all 12 perimeter edges of her cube) – therefore, the Teotihuacán New Jerusalem Diagram inner square perimeter is 7,920' * 4 = 31,680' is a true fractal of the actual New Jerusalem's 31,680,000' or 6,000 miles (6,000 miles * 5,280' = 31,680,000').

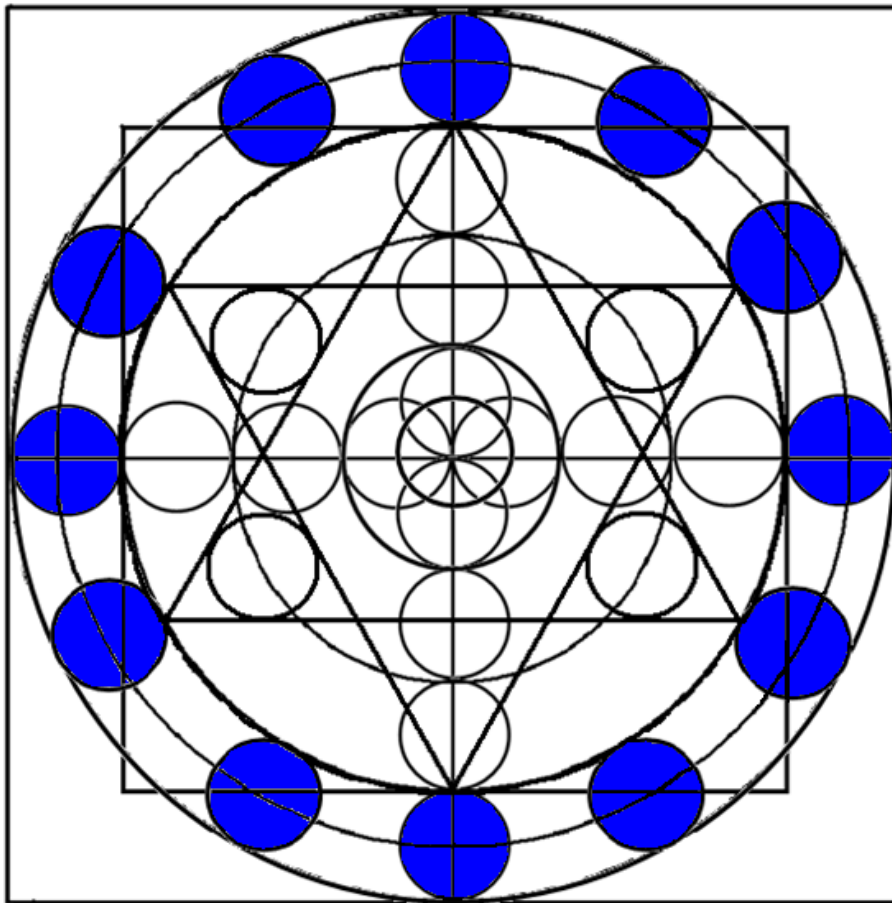

The LARGE SQUARE which encircles the sixth concentric circle spans eight 1,320' diameter Teotihuacán Moons and is representative of “8” as in New Beginning and LIFE and can also be seen as a demonstration of the 8 planets of the Solar System perfectly aligned along Earth's Diameter (or “axis”); however, the breadth of the greatest circle is as follows: 7,920' (the first circle within the square + 1,320 (1 moon) + 1,320' (2nd moon on its opposite side) = 10,560' or 5,280' * 2 = 10,560'. Therefore, this Larger Square – or shall we call it the All-Embracing Square of the Teotihuacán New Jerusalem Diagram – is TWO MILES in diameter; therefore, all four of its sides are likewise 2 miles in diameter and, consequently, as a four-square one-dimensional object it is 8 Imperial Miles in its perimeter – again, attesting to the “8”.

If the entire Outer Square “housing the outermost circle” were cubed – it would be viewed on one face having an eight mile perimeter * 6 = 48 Linear Mile perimeter but its cube has but 12 edges – therefore viewed from this perspective it has 12 * 2 mile edges = 24 miles but, again, viewed as a 4 – square cube with a perimeter of 8 miles on each face * 6 = 48 miles of “face perimeters.”

The 48 miles of “face perimeters” is equal to 253,440 feet or 3,041,280 inches – both of which have a digit sum of “**18**” aligned with the New Jerusalem Standard of Measurement. Yet, the 24 miles of 12 edges of the same cube has 126,720 Linear Feet and 1,520,640 Linear Inches of measurement – again, both having a digit sum of “**18**” to match the 48 Linear Mile “facial perimeters.”

The **CIRCUMFERENCE** of the circle with Earth's Diameter of 7,920 miles is identical to that of Earth's in that 7,920 mi. * 3.1418181818 (using the New Jerusalem PI) = 24,883.2 miles (a perfect replica of the Meridian Circumference of the Earth of 12 * 12 * 12 * 12 * 12 = as in 248,832 or 248832); however, the Greater Square of 10,560' diameter, as we shall see, has a circumference of 10,560' * 3.1418181818 = 33,177.6' or a digit sum of “**27**” – whereas, if simple PI were used at 3.14 * 10,560' diameter = 33,158.4' or a digit sum of “**24**” –

combined, the $27 + 24 = 51$ which is the number of Sacred Text of Jewish (24) and Christian (27) Scriptures.

The "Twelve Moons of The Teotihuacan New Jerusalem Diagram - Representing the Twelve Apostles of the Lamb - the Church - in the New Jerusalem Divine Governance - the 12 Foundations of the Holy City, New Jerusalem - Each having a diameter - 1,320' or .25 of an Imperial Mile - Composite Diameters: $12 * 1,320' = 15,840'$ which is "18" and $15,840' * 12" = 190,080" = "18"$ which is the New Jerusalem Standard of Measurement.

Moreover, and of keen interest, is the difference between the two spheres – between the diameter of Earth's 7,920 miles and that of the All-Inclusive embrace of the Larger Square having a diameter of two miles or 10,560 miles/feet.

Using the New Jerusalem Pi only we have:

$33,177.6' - 24,883.2' = 8,294.4'$ or a digit sum, again of “**27**” reflecting Messiah’s engagement - please notice that $33,177.6' = 27$ and $24,883.2' = 27$ and the difference between them is a digit sum of **27** = all attest to the revelation of Messiah as the Sun of Righteousness or $2 + 7 = 9$ and the 27 Text of Christian Sacred Canon.

The diameters of all “24 Moons” are: $24 * 1,320' = 31,680'$ which replicates the four-square measurement of the New Jerusalem or $792 * 4 = 3,168$ or **3168** = 3168 and $3168 = “18”$ which is the New Jerusalem Standard of Measurement. Again, these 24-Teotihuacán Moon diameters are representative of the Divine Governance of the New Jerusalem – her 24 Elders comprised of the 12 Tribes/Patriarchs of Israel under the influence of the Magan David/Star of David/Hexagon and the 12 Apostles of the Lamb/12 Disciples – the one (Israel) to the sphere of the Earth and the other (the Church) to the sphere to the heavens – yet both unite in their distinctive to create one Holy City, New Jerusalem – descending to the Earth, yet whose source is the Heavens.

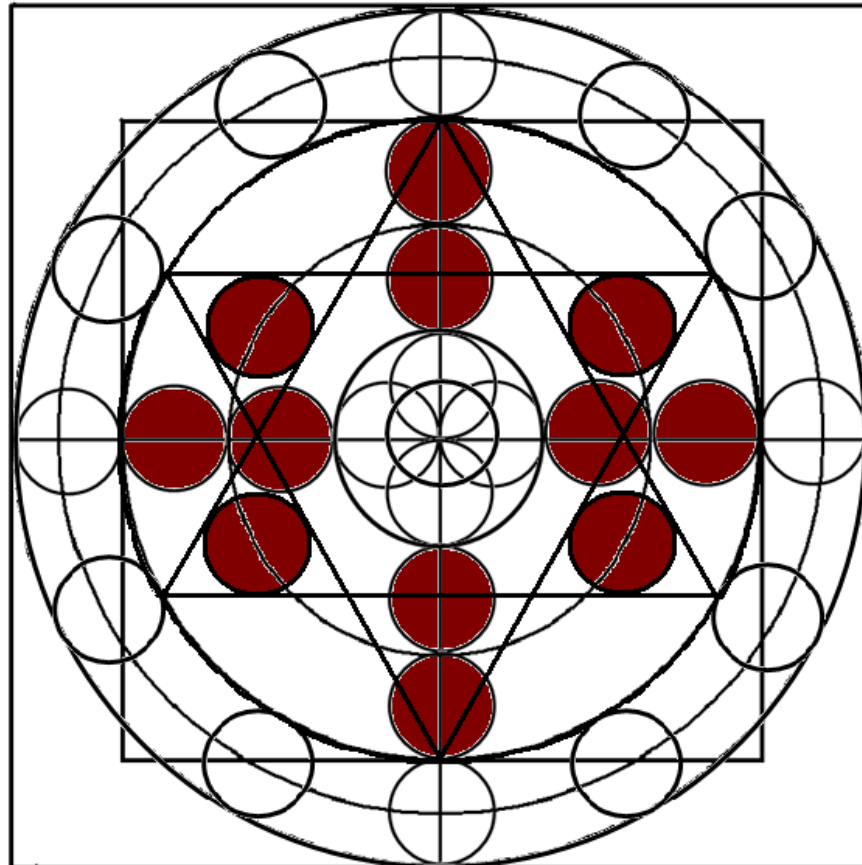

Each of the Concentric Six Circles which comprise the Teotihuacán New Jerusalem Diagram has a diameter and **circumferences as follows:**

Innermost Circle – Throne Room Circle = $1,320'$ (or $15,840''$) and a circumference of $4,147.2'$ or a digit sum of “**18**” – at the heart of the throne room is the Lamb with His Bride – the “18” the New Jerusalem! In inches the circumference equals: $4,147.2' * 12'' = 49,766.4'' = “36”$ the Eternal God. And, $18 * 36 = 648 = “18”$ or $6 \text{ (man)} * 108 \text{ (the measure of the New Jerusalem)} = 648$. Please note the **6...48** wherein the “6 faces of the cubed New Jerusalem” is seen, along with the “48” – in our Teotihuacán New Jerusalem Diagram this “48” constitutes the 48 Linear Miles of the Larger All-Embracing Square but whose very Innermost Circle attests to this “spiritual reality” in a figure combining its dimensions to produce in feet and inches ($18 * 36$) the **6...48**.

The Second Concentric Circle of the Four Living Creatures: $1,320' * 2 = 2,640'$ or a digit sum of “**12**” and $2,640'$ when multiplied by $12'' = 31,680''$ which again attests to the four-square platform of the New Jerusalem – its circumference is: $8,294.4' = “27”$ Digit Sum and in inches is equal to $99,532.8''$ or “**36**” the Eternal God without beginning or ending.

The Third Concentric Circle touching 12 of the Patriarchs of Israel – the 12 Gates of the Holy City has a diameter of: $4 * 1,320' = 5,280'$ or 1 Mile or in inches = **63,360''** which is a clear demonstration of the Messiah’s Sacrifice at the

age of “33” between Two Thieves (Man = 6) or 6...33...6. Its circumference is equal to: 16,588.8’ or “36” the Eternal God or in inches equals: 199,065.6” or a digit sum of “36” – again the Eternal God – please notice that in all calculations of each of the first three concentric circles there is “36” a perfect circle of 360°.

The Twelve Patriarchs of Israel - the Twelve Gates of the New Jerusalem - 3 on Each sides of the 4-sq. Holy City - the Magan David/Star of David/Hexagon touches all circles within the 7,920' Earth Diameter Square - Each small circle is 1,320' - they are the 12 Tribes of Israel gathered around the "Encampment" in the Wilderness - the "Throne Room" of the Almighty is in their midst - in the "Midst" of the 4 Living Creatures

Likewise, the product of the Third Concentric Circle in feet and inches is: $36 * 36 = 1,296$ whose digit sum equals “18” and is a full reflection of the New Jerusalem Standard of Measurement.

The Fourth Concentric Circle of the Teotihuacán New Jerusalem Diagram is the first “circle within the square” and is wholly representative of the New Jerusalem in that its diameter is that of Earth’s at 7,920’ or 7,920 Miles or in inches: $7,920' * 12'' = 95,040''$ which is the distance between the Earth and the Sun at apogee (furthest distance of their orbits). In all cases **792** and **954** = each in feet and in inches digit sums to “**18**” the New Jerusalem Standard of Measurement. Earth’s circumference is, of course: **24,883.2**’ (which is a fractal of Earth’s circumference in miles) or in inches is equal to: 298,598.4” in feet the digit sum is “**27**” and in inches the digit sum is: “**45**” - this “45” is the expression of the Second Coming or the Arising of the Sun of Righteousness as found in [Daniel 12:12](#) and the 1335th day which is 45 days beyond the end of the **1,290 Days of Desolation** ([Daniel 12:11](#)) and $27 + 45 = 72$ or the Name of God and $7 + 2 = 9$ = the Sun of Righteousness or $27 * 45 = 1,215$ which also is “**9**”.

The Fifth Concentric Circle dissects (at the center) of the 12 Moons of Teotihuacán’s perimeter and has a diameter equal to $1/2$ of 1,320’ or 660’ on either side added to the existing six diameters or $660' + 660' \text{ (either side)} + 6 * 1,320' = 7,920$ or $7,920' + 1,320' = 9,240'$ diameter of the fifth concentric circle – in inches equal to **110,880**” or “**18**” and also **1...18...8** = two sets of “18” or $9 + 9 = 18$.

The circumference of the fifth concentric circle is: $3.14181818 * 9,240' = 29,030.4'$ = a digit sum of “**18**” and in inches: $29,030.4' * 12'' = 348,364.8''$ or a digit sum of “**36**” and, again $36 + 18 = 54$ or the 5040 of Plato’s Optimal Number of Society but through the Sun of Righteousness in that $5 + 4 = 9$ and $18 * 36 = 648$ which is “**18**” and is $108 * 6 = 648$ demonstrating that “man” (**6**) was designed for the New Jerusalem (**18**).

The Sixth Concentric Circle is within the Greater Square and embraces all circles: Its diameter is 2 Miles across or 10,560’ or $8 * 1,320' = 10,560'$ which is “**12**” and in inches the diameter of the Sixth Concentric Circle is: **126,720**” which is “**18**” – the full expression of the New Jerusalem – it is also (i.e., **126...72**) the 1,260 days or 3.5 prophetic years equal to that of “**9**” as well and is the length of Daniel’s $\frac{1}{2}$ Week and is the total days of Messiah’s earthly Ministry at 3.5 Years or $360 \text{ days} * 3.5 \text{ prophetic years} = 1,260 \text{ days}$. The “**72**” is the Name of God. The Circumference of the Sixth concentric Circle is: $10,560' * 3.1418181818 = 33,177.6'$ = to a digit sum of “**27**” and in inches its circumference is $33,177.6' * 12'' = 398,131.2'' = 27$ (as well) and $27 + 27 = 54$ or “**9**” and the full expression of Societal Bliss: The New Jerusalem. Their $27 * 27$ product = **729** is “**18**” - therefore, the Outer Circle within the square manifests in its circumference the full

measurement of the New Jerusalem: “18” – and we can also see the “**72**” and “**9**” displayed wherein the Name of God and the Sun of Righteousness are so closely bound that the phrase: “He that has seen Me has seen the Father” – if you see it, you will understand it.

The total of all the 6 Concentric Circle Diameters is here displayed:

#1 = 1,320’ or 15,840”

#2 = 2,640’ or 31,680”

#3 = 5,280’ or 63,360”

#4 = 7,920’ or 95,040”

#5 = 9,240’ or 110,880”

#6 = 10,560’ or 126,720”

Totals:

All 6 Concentric Circle Diameters = 36,960’ or “**24**” = the Full Expression of Divine Governance – the CITY of God.

In Inches: 36,960’ * 12 = 443,520” = “**18**” = THE HOLY CITY: NEW JERUSALEM...but there’s more:

24 * 18 = **432** = “**9**” as the Sun of Righteousness and “**432**” is the radius of the Sun whose 864,000 mile diameter / 2 = 432,000 miles or 432.

Her six concentric circle circumferences:

#1 = 4,147.2’ or 49,766.4”

#2 = 8,294.4’ or 99,532.8”

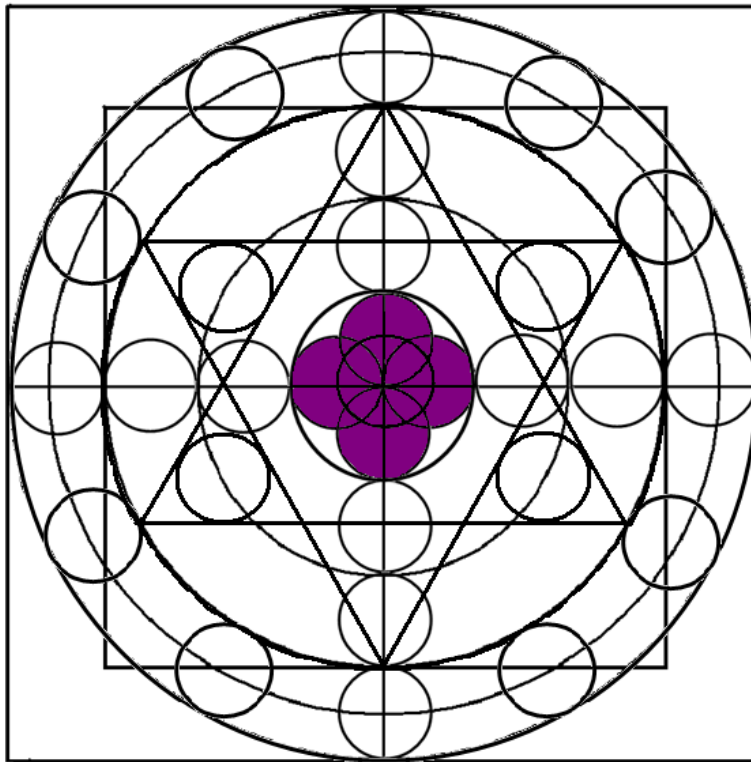

#3 = 16,588.8’ or 199,065.6”

#4 = 24,883.2’ or 298,598.4”

#5 = 29,030.4’ or 348,364.8”

#6 = 33,177.6’ or 398,131.2”

THE TEOTIHUACAN NEW JERUSALEM DIAGRAM

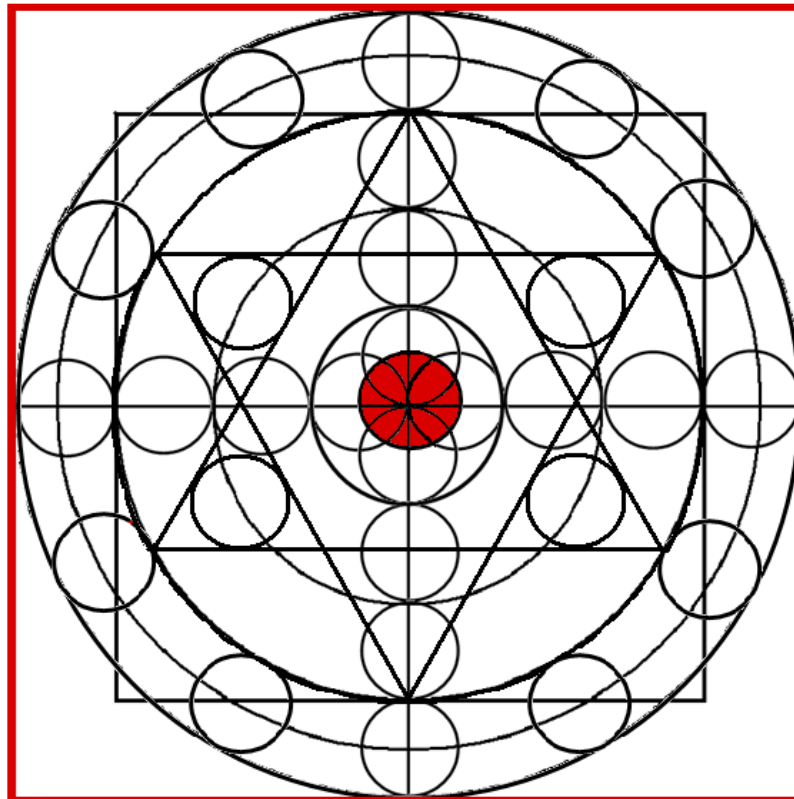

The "Four Living Creatures" before "The Throne of God" are seen here within the Teotihuacan inner circle - "And in the midst of the throne, and around the throne, were four living creatures full of eyes in from and in back" (Revelation 4:6) - These four Circles each have a diameter of 1,320' or 5,280' or 1 Mile or 63,360" or 6...33...6 showing Messiah (33) - the "Lamb Upon the Throne" - and the 6...6 show He was "cut off but not for Himself" but for human -kind as between "two thieves" (6 = man's number)

Total Circumferences of the Six Concentric Circles in Feet: $116,121.6' = \text{"18"}$ which is the Full Expression of the 12-edged perimeter of the New Jerusalem. In inches the total **circumferences** of the six concentric circles equal to: $1,393,459.2"$ or a digit sum of: **"36"** which is the Eternal God without Beginning or Ending and the perfect 360° of a Circle – indeed: This is the **ETERNAL CITY OF GOD AND THE LAMB WITH THE BRIDE OF MESSIAH**. And, as well: $18 * 36 = \text{648} = \text{"18"}$ and **6** (Man) is destined for the New Jerusalem (18) or $6 * 108 = 648$ or $6 * 18 = 108$. Also, and again, we see the "6 faces" of the cube and her 48-mile "facial measurements" of the Teotihuacán New Jerusalem Diagram wherein each face/side is viewed with an 8-mile perimeter * 6 sides/faces = **48**

(Linear Miles). Again, the 48 Linear Miles is equal to 253,440 Linear Feet or “**18**” and in inches is equal to 3,041,280 Linear Inches which is “**18**” and $18 * 18 = 324$ which is **108** * 3 = 324 and $108 * 6 = 648$ and $108 * 9 = 972$ which 972 is the fractal of the 9072’ 12-edged perimeter of the cubed Great Pyramid of Giza at 756’ (base edge) * 12 = 9072’.

THE TEOTIHUACAN NEW JERUSALEM DIAGRAM

**The Innermost Circle is the "Throne of God and the Lamb" (Rev. 22:3). It is RED as representative of the "Blood of the Lamb" - Forever is the "Suffering Servant" Who gave His all for His Beloved Bride - the Holy City, New Jerusalem upon His Throne
12 Patriarchs of Israel - 12 Apostles of the Lamb - 4 Living Creatures + 5 Concentric Circles = 33 Leading us to the Lamb upon the Throne Who at "33" was Cut Off but Not for Himself - The Lamb, the Final and Innermost Circle - Forever Red - Eternal Redemption**

The Superiority of the Imperial Mile

Allow me to insert at this time that I am altogether predisposed to the superiority of the Imperial Mile as that dimension of measurement employed by the Ancients –

its solar, numerical, calendrical, mathematical ease of measurement and its attestation to Sacred Canon of the Judeo-Christian “belief system” – a wholly comprehensive cosmological tool of Divine Worth.

It is altogether understandable and engrained in the thinking of civilized humanity. It is utterly incredible that the exceptionality of the Americans – or due to their formidable stubbornness – have not acquiesced to the global challenge of the metric system (they, the Americans, having little or no idea why).

The British who preserved its dimensional mysteries and authenticities simply fell under the spell of the Euro-continental prejudice – thinking they would embrace a superior and more technologically/scientific system of measurement...only to find its erroneous measurements [forever under review and constant adjustment](#)!

And, yes, this has everything to do with espousing design and interaction with or without the Creator – take your pick – I already have!

It's this incessant deprecation of ancient metrologies – coupled with the fact that many of the ancient dimensions of measurement were “take offs” from the superiority of the Sacred Cubit's $25.20''/2.1'$ – unless the system of measurement is uncompromised with the Imperial Mile it becomes exceedingly suspect; however, that caveat does not circumvent “look-a-likes” such as the Sumerian Foot of $13.2''$ – a most outstanding example of copycat and wholly attuned to that of the Imperial Mile – for $13.2''$ can be seen even in Teotihuacán's $1,320'$ persistence or $.25$ of a mile ($5,280'/4 = 1,320'$ or 132)

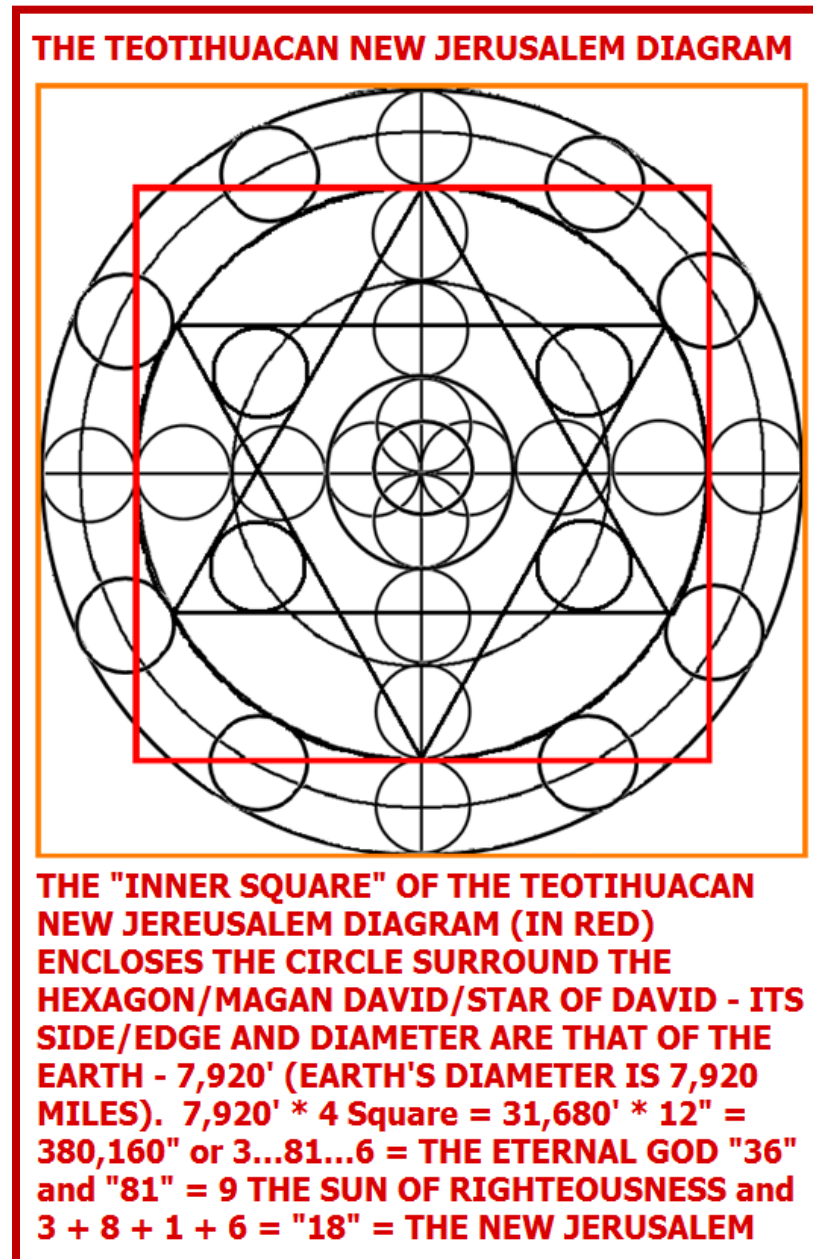

However, that said – and aside from the Egyptian Royal Cubit's immeasurable beauty of $20.6'' * 440$ (edge of the Great Pyramid of Giza) = $756'$ (rounded up) we observe most with great caution.

The Romans, Greeks, Egyptians, Babylonians, Assyrians, Persians and a host of civilizations have produced their own cubits, foot, [stade](#), furlong, mile, [digit](#), [pace](#), etc.

However, and once again (perhaps we will never know) the British alone are worthy of the preservation of this most dynamic system of measurement in all of its accuracy and simplicity.

Why they ever forsook it is beyond me (Britannia having “ruled the waves” from its ingenious Nautical Mile replication of the Imperial Mile) and the entire Sacred

Geometry community – at least the Nautical Mile seems relatively intact – whose dimensions still “rule the waves” and the air...wouldn't you know, it derives its persistence from the Imperial Mile no matter how hard the atheistic system of stupidity persists!

The Two Squares of the Teotihuacán New Jerusalem Diagram

Now, getting back to our squares...The larger of the squares which encloses the sixth, as well as all concentric circles, is 10,560' x 10,560' or 2 miles by 2 miles;

therefore, $2 * 2 = 4$ square miles on one of its cubed faces * 6 faces = **24 square miles** or a perfect reflection of divine governance as seen in the **24** Elders of the New Jerusalem.

The first square (**in red**) whose edges are equal to 7,920' (each edge) are the same as that of the New Jerusalem (7,920,000' or $792 = 792$) – therefore, all her measurements depict that of the New Jerusalem proper or $7,920' * 12 = 95,040' / 5,280'$ (5,280' in 1 mile) = **18** or by adding zero to 18,000 miles - her 12 edge perimeter, the New Jerusalem – all her measurements are identical in that the diameter is 7,920' and the 7,920' is the reflection of “18” itself and is the length of the Teotihuacán “City of God”!

Even so: $12 * 10,560'$ (12 edges of a cube) = **126,720** Linear Feet or the “**18**” of the New Jerusalem as well as the “**126**” or 3.5 years of Messiah’s Ministry and Daniel’s 1/2 Week and “**72**” is the Name of God.

These dimensions in inches tell us: $126,720' * 12'' = 1,520,640'' = “18”$ of the New Jerusalem – so in Feet and Inches both dimensions digit sum to “18” and $18 + 18 = 36 =$ Eternal God for the City is the Eternal City of God. Please note that in this figure of **1,520,640**” we have “**15**” and “**264**” – herein is the Edge of the New Jerusalem (**15**) as well as “**264**” which is .5 of a mile or $264 / 2 = 132$ or the 1,320' diameter of the Moons of Teotihuacán and the diameters of all of our smaller circles – the 24 and the 4, as well as the Throne Room of God and the Lamb at the heart of the Teotihuacán New Jerusalem Diagram.

The simplicity of these measurements utterly astounds – it is NOT COMPLICATED – there are not a lot of difficult formulae to endure – they are straight forward and, literally, a sixth grade math student should know how to do all of them!

The AREA of the 10,560' x 10,560' Larger Square or the All-Embracing Square is truly gratifying in that its one side square footage is:

$10,560' * 10,560' = 11,513,600$ sq. ft. = “**18**” which is the EXPRESSION of the New Jerusalem Standard of Measurement. It can be pointed out that $10,560' / 660'$ (1 furlong) = 16 furlongs; therefore, $16 * 16$ (one face of this cubed object) = 256 * 6 faces of a cubed Larger Square = 1,536 Sq. Furlongs or “**15**” which is the Edge Measurement of the New Jerusalem as in 1,500 miles or “15.” This figure is further amplified (i.e., “15”) when the actual measurements of the New Jerusalem’s 12,000 furlong edge drops its zeroes and we have $12 * 12 = 144 * 6$

faces of a cubed NJ = **864** (the fractal of the Sun's diameter) – therefore, 1,536 sq. furlongs less 864 sq. furlongs or 1536 less 864 = 672 = “**15**” which is the digit sum difference between the two measurements.

In sq. inches one face of the above cubed Larger Square/All-Embracing Square = 11,513,600 sq. ft. * 144 = 1,657,958,400 sq. inches = “**45**” digit sum which is 4 + 5 = **9** and is the 45 Days of the Arising of the Sun of Righteousness (cf. [Daniel 12:12](#)) and the 45 days beyond the 1,290 days of desolation or to the 1,335th Day.

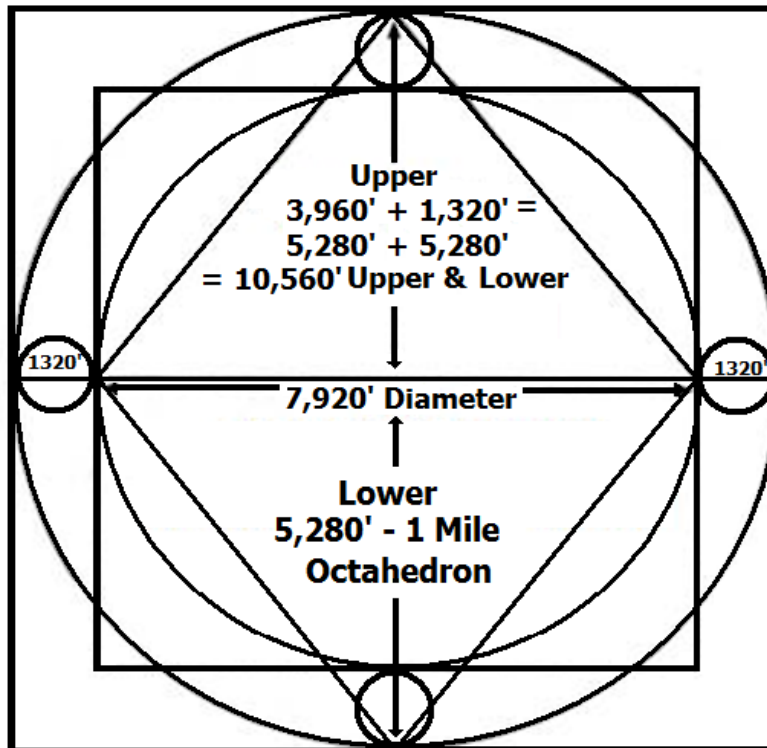

The Teotihuacán New Jerusalem Diagram continues to expound eternal themes of the Holy City with remarkable integrity and astonishing commitment to the Imperial Mile at every turn. The Imperial Mile, on the other hand, is predicated upon the dimensional responsibility of the Sacred Cubit which in turn upon the duodecimal system of measurement (12) for 5,280' (one mile) / 2.1' (Sacred Cubit) = 2,514 (whole numbers) or a digit sum of “**12**” and the remaining number sets are a repeat of the 142857 of Pi as in $22/7 = 3.142857^\infty$ (i.e., 2,5**14.2857**) – **therefore, the Sacred Cubit embodies the major numeric of the New Jerusalem (12) and the eternal value of Pi (the circle).** Furthermore, it is of some notoriety that a circle whose diameter of 5,280' * 3.142857 has a circumference of 16,594.28496 Linear Feet or a digit sum of “**54**” connoting the splendid results of Society Bliss as seen in the 5040 or Plato's Magnesia (notwithstanding Plato's “population control” issues which some find repulsive – and rightly so – although his was a “heavenly ideal” upon Earth).

Now – we come to all six faces of the Larger-All-Embracing Square of the Teotihuacán New Jerusalem Diagram:

These 11,513,600 sq. ft. (one face of the outmost square) * 6 (faces of a cube) = 69,081,600 sq. feet = “**30**”...in that “3” not only stands for the Triune God but the first object of three sides/the triangle from whence all objects take their cue/commencement and it is the age of Messiah at the Commencement of Ministry at the age of 30.

Furthermore, 69,081,600 sq. feet * 144 sq. inches (1 sq. ft.) = 9,947,750,400 sq. inches or “**45**” which, again, is “**9**” but is the 45 days of the Arising of the Sun of Righteousness with Healing in His Wings according to [Daniel 12:12](#) and [Malachi 4:1-2](#). Likewise, 30 * 45 = 1,350 or “**9**” and points to the person and work of the Sun of Righteousness.

When **30** is added to **45** we arrive at the prophetic potency of the “**75**” days beyond the 70th Week of Daniel’s Prophecy – wherein the Great Day of God arrives unto the 30 days beyond the end of the Week during which thirty days the Seven Vials are Poured out upon the Earth (30 days of judgment) and then the 45 days of blessing – **30 + 45 = 75**.

The All-Embracing Greater Square of the Teotihuacan New Jerusalem Diagram as a Pyramidal Object - Diameter of 10,560' is contrasted to the classic New Jerusalem Diagram Square of 7,920' Diameter (Earth) Circumference of the 7,920' Earth = $3.14181818 \times 7,920' = 24,883.2$ Miles - her four-square perimeter is $7,920' \times 4 = 31,680'$ or a fractal of the NJ's 31,680,000' 4-sq. perimeter and the Earth's 31,680 Mile 4-Square. The Circumference of the All-Embracing Teotihuacan New Jerusalem Diagram 4-Square is $10,560' \times 3.14181818$ (New Jerusalem Pi) = 33,177.6' and her perimeter is $10,560' \times 4 = 42,240'$ or in inches at 506,880" - Difference between 33,177.6' less 24,883.2' is 8,294.4' or 99,532.8"

In acres, the 69,081,600 sq. feet of the Teotihuacán New Jerusalem Diagram’s all embracing square is divided by 43,560 sq. feet in one acre and we find:
 $69,081,600 \text{ sq. feet} / 43,560 \text{ sq. feet} = \dots 1585.8953168044077134986225895317$
 (to be utterly precise) = don’t bother, the digit sum is **154** or the **One** True God +

54 which, again, is Plato's Optimal Number of Societal Bliss – herein is a marvel – the entire outward expression of the Teotihuacán New Jerusalem Diagram is wholly given over to the One True God Who desires the best for humanity, which is the New Jerusalem in and through the Sun of Righteousness in that $5 + 4 = 9$.

Am I crunching the numbers? You better believe I am – why not – they never lie – they keep telling us the Eternal's Purposes over and over again until we get it right!

The Teotihuacán City of God expressed on this Earth is a glorious prophetic promise to mankind – pointing to the End of Days and the consummation of time, wherein “time shall be no more.”

Her “**diagonals**” are wholly expressive of the divine intent – these “crisscrosses” of the [Sun-Star of Peru](#) produce staggering relationships of Divine import – just as the dimensions of the Larger Square – the All-Embracing Four-Square of the Teotihuacán New Jerusalem Diagram which surrounds the 24 and the 4 –

The diagonal on her face of 10,560' by 10,560' is 14,934.09' (precisely) which is “**21**” as a digit sum – therefore, having “12” such diagonals crisscrossing on her 6 faces (2 on each face crisscrossing) we can once again see the “**21**” and “**12**” of Teotihuacán as the “platform” of the New Jerusalem as seen, also, in the [Peruvian Sun-Star and Cross wherein the 21 x 21](#) (incorporating the Cross and the Sun-Star) or the 12 x 12 Displaying the Sun-Star alone.

In that there are 12 such “21s” (i.e., 2 diagonals on each face of a cube * 6 faces = 12 diagonals) we see the Sacred Cubit (2.1' or 21) hard at work again measuring the City of God...of course, 12 + 21 equals Messiah's (i.e., “33”) supreme love and sacrifice for humanity – for He gave Himself an offering for us all at **33** years of age and $12 * 21 = 252$ which is the very Sacred Cubit or **25.20**” – therefore, is not the 2112 and the 252 linked in Divine Measurement? Absolutely! And, yes, the “252” is the distance from the Earth to the Moon at their apogee – i.e., 252,000 miles.

Her diagonal of 14,934.09' in inches is: 179,209.08” or a digit sum of the Eternal God at “**36**” – for eternity is in view here as well (360° in a circle having no beginning or ending).

I hasten to add that the “21” in feet of the 14,934.09' diagonal of the Larger-All-Embracing Square of the Teotihuacán New Jerusalem Diagram when matched with the same dimension in inches or “36” (i.e., 179,209.08”) gives us a product of

fascination as in $21 * 36 = 756$ (also “18”) which “756” is the very prime measurement of the base of the Great Pyramid of Giza in feet! Why not – is not the Great Pyramid of Giza a MONUMENT TO THE LORD AT THE BORDER OF EGYPT? Absolutely...and is not she, as well, a reflection of the New Jerusalem – again – DEFINITELY! (Please see: [Isaiah 20:19-21](#).)

Now, each crisscrossed square or face of the Teotihuacán New Jerusalem Diagram’s Larger Square – her all-embracing square – is calculated as follows and throughout:

One diagonal = $14,934.09' * 2$ (crisscrossed) = $29,868.18'$ (a digit sum of “42” per side – and, having six sides we discover the following: $6 * 42 = 252$ which is, again, a reflection of the Sacred Cubit (i.e., 25.20”) at work in these divine measurements). Go figure: 2 crisscrossed diagonals $* 6 = 12$ on a cube and their digit sum in turn is $6 * 42 = 252$ or the Sacred Cubit’s 25.20” or 2.1’ or “21” – therefore, we have, once again... “21” and “12” or 2112.

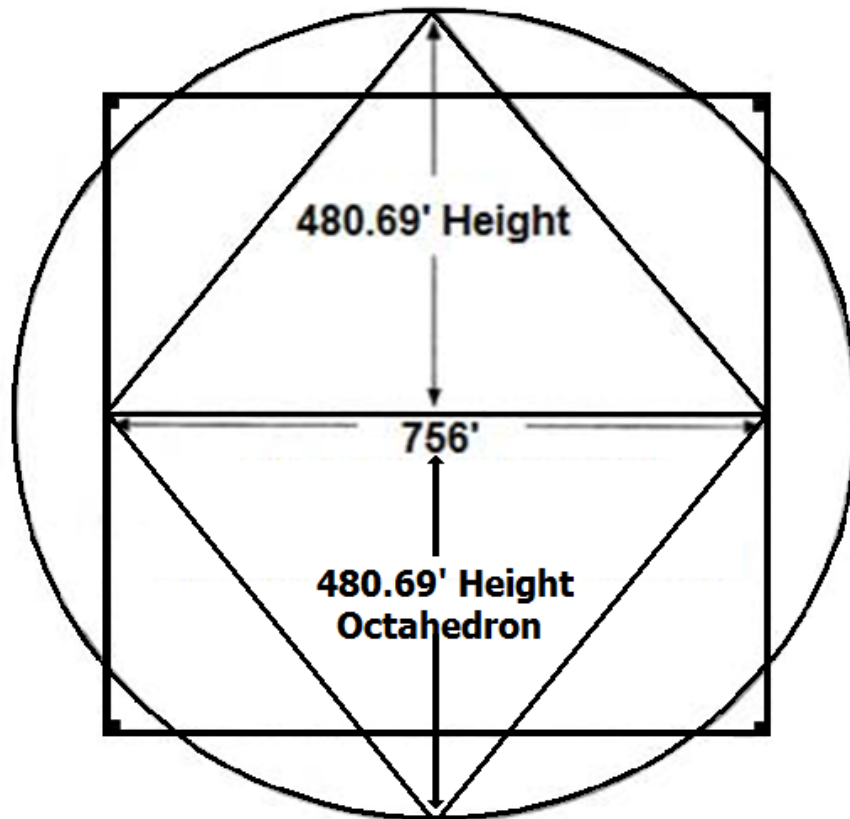

Furthermore, $29,868.18' * 12'' = 358,418.16''$ or a digit sum of “36” in expression of eternity, the Eternal God and His Eternal, Holy City, New Jerusalem. These two sets in feet (42) and in inches (36) when combined produce a product of astonishment: $42 * 36 = 1,512$ which is the precise measurement of two edges of the Great Pyramid of Giza in feet as in $756' * 2 = 1,512'$ which in Greek Gematria means *Apocalypse* in signaling the “end of days.”

Now – allow us to calculate all her faces of this All-Embracing Object of Antiquity – the Teotihuacán New Jerusalem Diagram, which Diagram is created from the dimensions of the Teotihuacán Complex’s 7,920’ (1.5 miles) length and 2,640’ (.5 mile) width divided in half at her Axis (erroneously labeled the “Avenue of the Dead”) and thereby creating ($7,920'/6 = 1,320'$) on either side, six (for a total of 12) distinct squares measuring 1,320’ by 1,320’ (.25 mile x .25 mile square) and, therefore, twelve circles whose individual diameters are each 1,320’.

As previously stated, together these 12 moons have a composite diameter of $1,320' * 12 = 15,840'$ or in inches of 190,080” which in either case digit sums to “18” and is therefore fully reflective of the prime Standard of Measurement of the New Jerusalem.

All of the 12 each $1,320' x 1,320'$ as “four-square” (four base edges only) are equal to $4 * 12 = 48 * 1,320' = 63,360'$ which is reflective of Messiah’s Offering or 6...33...6 at age 33 between two thieves (man = 6) and this is likewise “18” and

in inches is 760,320" which also is "18." If cubed (i.e., each 1,320' by 1,320' Teotihuacán Moon "Square") would equal $1,320' * 12 = 15,840' \text{ (each)} * 12 \text{ Moons} = 190,080'$ (same figure as in inches) or, again, to "18" and in inches all 12 cubes of $1,320' \times 1,320' = 2,280,960 \text{ Linear Inches}$ or "27" as in the Messiah Revealed or $2 + 7 = 9 = \text{the Sun of Righteousness}$.

Circumference of the Circle is equal to: The Diameter of the Large Circle (or $2 * 480.69' = 961.38'$) $* 3.1417647$ (Pi @ $480.69/153$) or $961.38' * 3.1417647 = 3,020.4'$ which is a fractal of the Great Pyramid of Giza's base measurement of $756' * 4 = 3024'$.

The $18 + 27$ combine for "45" as the Arising of the Sun of Righteousness on those Blessed 45 days found in [Daniel 12:12](#) and $18 * 27 = 486$ which is $1/2$ of the cubed (12-edged) Great Pyramid of Giza at $756' * 12 = 9072'$ or $972 = 972$, and, of course, $486 = "18"$ as does $972 = 18$.

Gloriously redundant!!

Please note these “12 Moons” are but 1/2 of the 24 which are created in the Teotihuacán New Jerusalem Diagram.

If, as we already suggest, the Teotihuacán New Jerusalem Diagram is likewise exemplified as an octahedron – having at top (heavenly expression) and a bottom (earthly impression) (two spheres or dimensions) – then are these geometric expressions wholly realistic.

The Great Pyramid of Egypt is, likewise, an octahedron (1/2 octahedron) and is, therefore, shown as such in many of its dimensional considerations (see below).

One face crisscrossed or 2 diagonals (i.e., of the All-Embracing Square of the Teotihuacán New Jerusalem Diagram with a diameter/edge of 10,560’ or 2 miles and 1 diagonal of 14,932.09’) = 29,868.18’ * 6 (faces of a cubed object) = 179,209.08 Linear Feet or “**36**” for from whatever direction one views her – she is the *ETERNAL* GOD’S ETERNAL CITY, New Jerusalem. And – in inches * 12” = 2,150,508.96 Linear Inches = “**36**” – for again, the Eternal God displays His Eternal City and His Name is upon her for 36 + 36 = **72** and there is no need of the Light for the Lamb is the Lamp of this Eternal City in that 7 + 2 = **9** = the Sun of Righteousness and, furthermore, 3 + 6 (feet) = **9** and 3 + 6 (inches) = 9 and **99** = the Magnification of the Sun of Righteousness and, as well, 9 * 9 = **81** and 8 + 1 = **9** and 9 + 9 = **18** which is the New Jerusalem Standard of Measurement.

Indeed, 36 * 36 = 1,296 = “**18**” or 1 * 2 * 9 * 6 = **108** = **18** = the New Jerusalem Standard of Measurement.

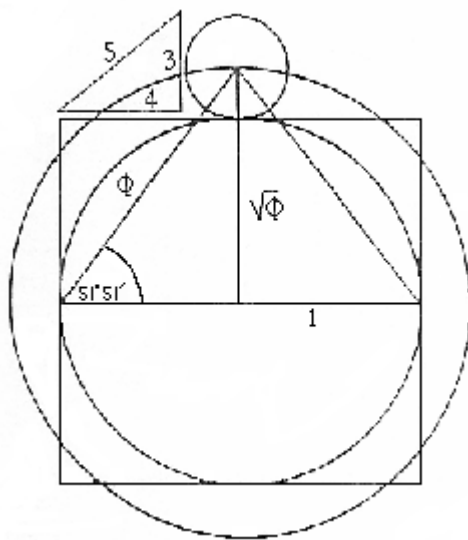

But there is more, much more

The cubic sq. footage of this masterpiece known as the Teotihuacán New Jerusalem Diagram – in all her fullness gives rise to these calculations:

In cubic feet she is 10,560’ * 10,560’ * 10,560’ = 1,177,583,616,000 cubic feet or a marvelous digit sum of “**45**” whose “content” is that of the Arising of the Sun of Righteousness and those “blessed days” known as the “45” and 4 + 5 = **9** = this is the Sun of Righteousness. Now, in cubic inches we calculate: 1,177,583,616,000 cubic feet * 1,728 cubic inches in on sq. cubic foot = 2,034,**864**,488,448,000 cubic inches. This is a most amazing discovery – for “embedded” within this exhaustive calculation is the “**864**” of the Sun of Righteousness, reflecting the Sun’s 864,000 mile diameter. Her digit sum is all the more impressive – for it is: “**63**” which signals 6 * 3 = “**18**” or 6 + 3 = “**9**” and this bespeaks of both the New Jerusalem

and the Sun of Righteousness; however, when we combine the cubic feet digit sum of “45” with that of the “63” we again are driven to His original intent and purpose of the ages: THE NEW JERUSALEM: $45 + 63 = \text{“108”}$ or “18” and, furthermore, $45 * 63 = 2,835$ whose digit sum amplifies the “18” of the New Jerusalem – again and again the “18” reigns supreme in our calculations – the entire expression of the Teotihuacán New Jerusalem Diagram – her fullness – is that of the New Jerusalem – the City God!

But as we view this extravagant number set of **234...864...48...84...84** (her “Cubic Capacity/Volume or Fullness” of the Teotihuacán New Jerusalem Diagram) we see $2 + 3 + 4 = \text{“9”}$ (the Sun of Righteousness) and then the Sun

Himself as seen in the **864** (864,000 Mile Sun’s Diameter) and then three sets of “12” ($4 + 8 = \text{12}$ and $8 + 4 = \text{12}$ and $8 + 4 = \text{12}$). Combined to produce a “product” these three sets of 12 replicate the Volume/Fullness of the very New Jerusalem wherein 12,000 furlongs is her edge or as John Michell brilliantly suggests by elimination of the zero we may find her “side measurement” to be that of the Wall of the New Jerusalem or $12 * 12 = 144$. Likewise, may we suggest that by eliminating her zeroes of 12,000 (furlongs) we may produce her volume or capacity/fullness as in $12 * 12 * 12 = 1728$ or “18” as per “normal!” This volume of the New

Jerusalem is in furlongs as in 12,000 furlongs * 12,000 furlongs * 12,000 furlongs or 1,728,000,000,000 cubic furlongs or **1728**. Is this a stretch? Am I crunching the numbers? Listen...THEY ARE THERE – you decide – but can you see them? I think you can. But for the skeptics among us and instead of “squaring the circle” we will “circle the square!” Carefully watch: **9** (as in 234) * 864 (as in 864) * 12 (as in 48) * 12 (as in 84) * 12 (as in 84) = 13,436,928 whose digit sum is “**36**” and VOILA! We have a **360°** circle.

The “reverse” of “circle the square” is to “square the circle” – here we briefly examine this “[Masonic treachery](#)” as some have deemed it...

In the diagram (aside), the big triangle is the same proportion and angle of the Great Pyramid, with its base angles at 51 degrees 51 minutes. If you bisect this triangle and assign a value of 1 to each base, then the hypotenuse (the side opposite

the right angle) equals phi (1.618...) and the perpendicular side equals the square root of **phi**.

A circle is drawn with its center and diameter the same as the base of the large triangle. This represents the circumference of the earth. A square is then drawn to touch the outside of the earth circle.

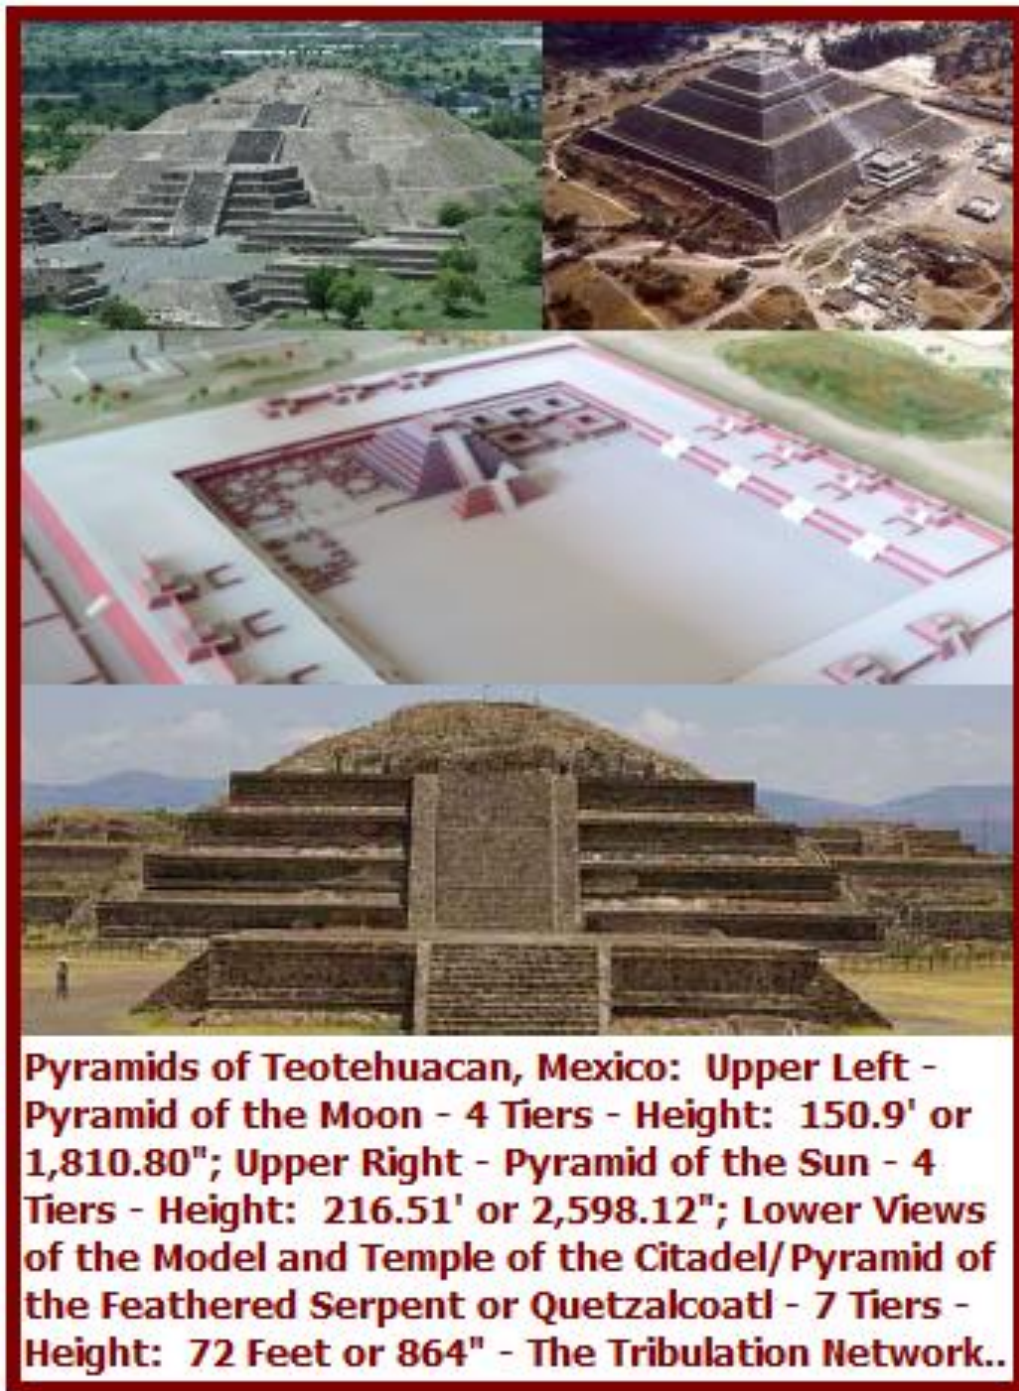

A second circle is then drawn around the first one, with its circumference equal to the perimeter of the square. (The squaring of the circle.) This new circle will actually pass exactly through the apex of the pyramid.

A circle drawn with its centre at the apex of the pyramid and its radius just long enough to touch the earth's circle, will have the circumference of the moon! The small triangle formed by the moon and the earth square will be a perfect 3...4...5 triangle (related to the Pythagorean Theorem). Using the 345 triangle is also the easiest way to draw a squared circle.

The Teotihuacán New Jerusalem Diagram is not necessarily comparing apples to oranges; however, there are some amazing calculations which further our investigation of just what was going on among the Ancients in their laying out of this most wondrous site of antiquity – now made known unto the children of men...can we be so audacious? Well, we are...for behold – the Octahedron of Teotihuacán:

The Pyramids of Teotihuacán – Tiers and Heights -

There are a myriad of calculations relative to the elevations/heights and the number tiers per each of the three major Pyramids of Teotihuacán: The Pyramid of the Moon, the Pyramid of the Sun and the Pyramid of the Feathered Serpent/Quetzalcoatl.

These measurements are all the more difficult in that sundry excavations have been somewhat merciless; however, by their general inter-relationships and subservience to the Imperial Mile/Sacred Cubit and the voluminous research of formidable archaeologists and metrologists we have been able to ascertain fairly accurate renderings of both their heights (Note: Here we speak not of their

elevations from sea level but ground levels, in the main.) and the original number of “tiers” of these “step pyramids.”

First of all, I wish for you to review the graphic above in which we placed these superb specimens of antiquity in proximity to each other in order to better read their expressions.

The upper left bears witness to the Pyramid of the Moon – the first such pyramid of the three. Now, although its elevation is not as great as that of the Pyramid of the Sun, its overall elevation from sea level is the same (it has a higher Earth Elevation than that of the Pyramid of the Sun).

Secondly, the upper right is that of the Pyramid of the Sun which is the third largest in the world and the largest of the three pyramids at Teotihuacán.

Thirdly, the Pyramid or Temple of the Feathered Serpent, also known as the Pyramid/Temple of Quetzalcoatl.

The singular and corporate inter-relationships is somewhat astounding when subjected to the Imperial Mile from whence the entire complex – as per this author’s final answer to this most sacred of mysteries attests in that the Teotihuacán’s dimensions reflect those of the New Jerusalem, the Holy City.

Therefore, it is imperative that the name of Teotihuacán be forever stricken from the record as a throwback to the fiendish practices of the Aztecs or Toltec and even Mayans.

All of these tribal associations were NOT the original architects of these reflections of celestial merit heretofore misunderstood by metrologists and archaeologists alike but wholly in keeping with those measurements of the Ancients whose marks are all over these dimensions – and those of the Great Pyramid of Giza, the Sun-Star and Cross of Peru, as well, would you believe, that infernal Druid consternation so despised by Christians known as Stonehenge on the British Isle – now I’ve really gone over the proverbial top!

But do bear with me...

The TIERS of the Pyramids of the Moon, Sun and Quetzalcoatl...

The average sea level elevation of what is known as San Juan Teotihuacán is fairly remarkable in that in meters it is [2278](#) which in Imperial Feet is 7,473.75 feet. Here we encounter, once again, our 2112 wherein $7+4+7+3 = "21"$ and $“.7+5"$ is equal to $"12."$ Happenstance? Well, the Divine Platform of $"2112"$ seems to be a reoccurring theme; therefore, I am not surprised to see this figure once again – let alone the perimeter in Imperial Feet of the Teotihuacán Sacred District is, likewise, 21,120 Imperial Feet or, since it is a reflection of the New Jerusalem: $21,120' * 12" = 253,440" = "18"$ (digit sum) = the New Jerusalem Standard of Measurement.

Allow me to list the elevations from ground to tip of the Pyramids of the Moon, Sun and Quetzalcoatl:

[150.9'](#) – Pyramid of the Moon or 1,810.80 Linear Inches

[216.51'](#) – Pyramid of the Sun or 2,598.12 Linear Inches

[72'](#) – Temple of Quetzalcoatl/Feathered Serpent or 804 Linear Inches

Difference between the Pyramid of the Moon and the Pyramid of the Sun – the Pyramid of the Sun is $65.61'$ or $787.32"$.

That difference “digit sums” to $"18"$ ($6 + 5 + 6 + 1 = 18$) or $"27"$ in Inches and is in perfect keeping with the New Jerusalem (18) and Messiah (27). Indeed, together $18 + 27 = "45"$ and connotes the Arising of the Sun of Righteousness on that very day – the “Great Day of God” (Malachi 4:1-2). Also, $18 * 27 = 486$ which is likewise $"18"$ – however, $486 * 2 = 9,072$ which is the fractal of the 9072 Linear Feet of a 12-edged cubed Great Pyramid of Giza.

The difference from the Pyramid of the Moon and that of the Pyramid of the Feathered Serpent is as follows: $150.90' - 72.00' = 78.9'$ or a digit sum of $"24"$ indicative of Divine Governance or the “24 Elders” of the New Jerusalem. In inches that difference is again $"27"$ (Messiah Revealed) – with $24 + 27 = 51$ and this 51 is indicative of the 51 text of the Jewish (24) and the Christian (27) Sacred Canon – strongly so.

The difference between the Pyramid of the Sun and that of Quetzalcoatl is: $216.51' - 72.00' = 144.51'$. And, need I say more? Not only is the priority number of the Wall of the New Jerusalem expressed in the $"144"$ but the $"51"$ is again manifested indicating that the $"144"$ is achieved through the Revelation of Messiah in BOTH the Sacred Text of Jewish (24) and Christian (27) Sacred Texts for a total of 51 Sacred Texts.

In inches that $144.51' * 12'' = 1,734.12''$ or “**18**” which is a full reflection of the New Jerusalem Standard of Measurement – and not surprising for the Sun of Righteousness (Pyramid of the Sun) and His intention is to seek His Beloved Bride – the New Jerusalem, the Woman, the Holy City (18).

The sum of all the elevations of these three major structures is as follows:

$150.9' \text{ (Moon)} + 216.51' \text{ (Sun)} + 72' \text{ (Feathered Serpent)} = 439.41' = \text{digit sum of “21”}$ – and, once again, we see this as a manifestation of the “Divine Plan/Platform” upon which the Eternal is working out His purpose.

In inches that total elevation is: $439.41' * 12'' = 5,271.92'' = “27”$ as the full revelation of the Messiah. Also: $21 + 27 = “48”$ and this “48” could easily be construed to match the 48 “perfect squares” of $660' \times 660'$ found upon the entire platform of the Sacred District of Teotihuacán – wherein $660' * 660' = 435,600 \text{ sq. ft.} / 43,560 = 10 \text{ acres} * 48 = 480 \text{ acres}$ (which is the total acreage of the Sacred District).

Naturally – $21 * 27 = 567 = “18” = \text{New Jerusalem Standard of Measurement.}$

The TIERS:

The simplicity of the Tiers and their recognition as square/rectangular 360° interior sum of angles...therefore:

Pyramid of the Moon – Total Tiers: 4

(Note: Although some indicate 5 – but its appearance is that of 4 only – the “front altar” is 5 tiered as well.) (Therefore: 4 to 5)

Pyramid of the Sun – Total Tiers: 4

(Note: Originally thought to have had 6 but only 4 remain – some say [5](#)) (Therefore 4 to 6)

Temple of the Feathered Serpent/Quetzalcoatl – Total Tiers: 6 or **7** or [9](#)

(Therefore 6 to 9)

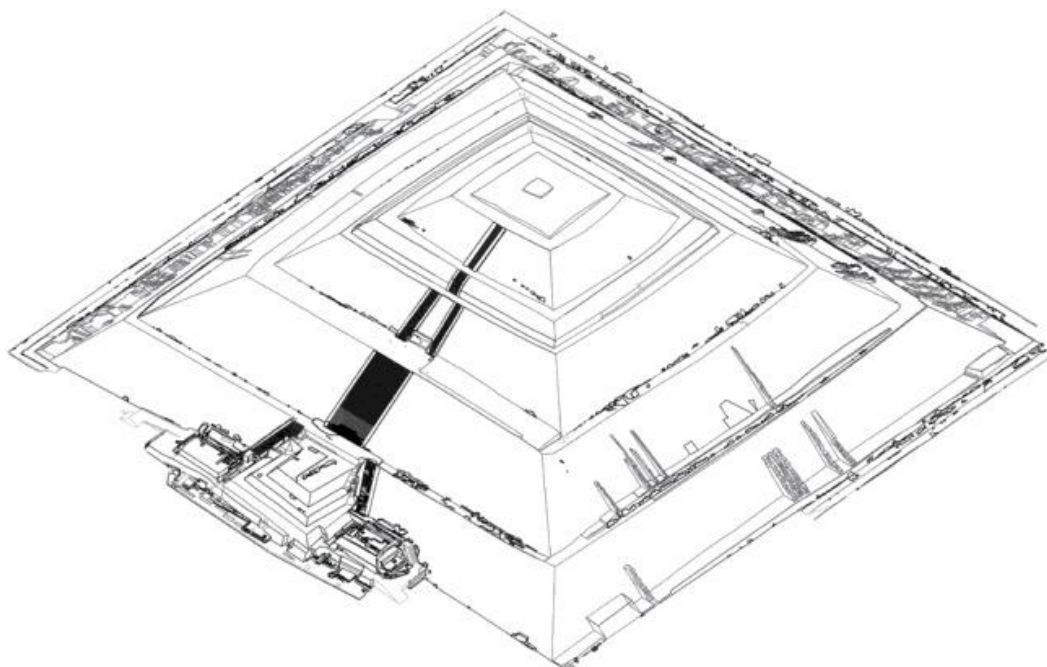

Figure 11.4. 3D map of the Sun Pyramid, created with AutoCad. The data were recovered with Total Station in 2004–2006 by the Moon Pyramid Project.

Table 11.1. Comparative data on the size of paired platforms in the Moon Plaza

	First platform	Difference	Second platform	Difference	Staircase	Difference	Staircase at second platform	Difference	a: Staircase b: At second platform

Note: Width in metres; from the three-dimensional plan created by the Moon Pyramid Project.

If we take the “supposed” number tiers of the three objects at their maximum: Moon (5) + Sun (6) + Feathered Serpent (9) we arrive at “20” – therefore, in degrees we find $20 * 180^\circ = 3,600^\circ$ and wholly representative of the 360° Circle of the Eternal God and of the planets (circumference and degrees therein); however, if the Pyramids of the Moon and Sun were taken at 4 each and the Feathered Serpent at 7 we would have $8 + 7 = 15 * 180^\circ = 2,700^\circ$ or the full expression of Messiah (27).

It would appear that the majority of views indicates that the Pyramid of the Moon is at 4 tiers and that of the Sun at 4 tiers and that of the Feathered Serpent at 7 tiers for a total of 15; giving our 2,700° expression the most credibility.

Steps of the Teotihuacan's Pyramids:

Little doubt abides that the Pyramid of the Sun has some 248 steps; Pyramid of the Moon has [4 sets of 91 steps](#) each for a total of 364 steps (close to one solar year); the Temple of Quetzalcoatl has a total “[outside staircase](#)” of 120 steps. Although some dispute abides these calculations – these appear to be the most accurate; therefore, the grand total of steps is: 364 (Moon) 248 (Sun) + 120 (Quetzalcoatl) = 732 steps or a digit sum of “12” well in keeping with the duodecimal system of the overall measurements of Teotihuacán. Interestingly enough, their “product” is equal to the divine governance of the complex as in $364 * 248 * 120 = 10,832,640 = “24”$ – therefore, $12 + 24 = 36$ which connotes the Eternal God and the 360° in the circle. Finally $12 * 24 = 288 / 2 = 144$ – and, so it goes....

Egypt and Mexico - more coincidences?

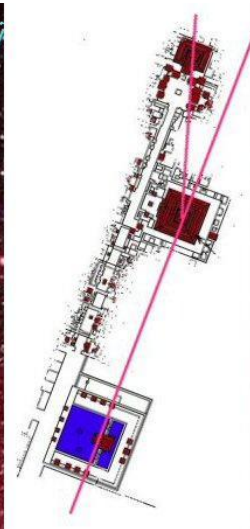

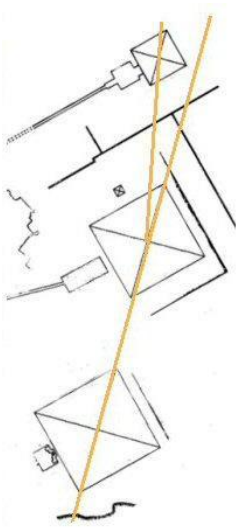

In his book, *Fingerprints of the Gods*, [Graham Hancock's](#) insights are somewhat interesting and provocative regarding Teotihuacán...and, rightly so, in that his dabbling into the occult and Sacred Geometry is of no small consequence. A number of his compilations and those of others are interspersed hereunder from a rather odd resource known as [AZAZAZAZAZ](#), with footnotes found at this site, and quotes given in **BLUE** with my comments interspersed... (Hancock's page numbers are duly noted as well.)

“After completing his studies of the pyramids and avenues of Teotihuacán, Stasbury Hagar concluded: ‘**We have not yet realized either the importance or the refinement, or the widespread distribution throughout ancient America, of the astronomical cult of which the celestial plan was a feature, and of which Teotihuacán was one of the principal centres.**’¹³

But was this just an astronomical 'cult'? Or was it something approximating more closely to what we might call a science? And whether cult or science, was it

realistic to suppose that it had enjoyed 'widespread distribution' only in the Americas when there was so much evidence linking it to other parts of the ancient world?

For example, archaeo-astronomers making use of the latest star-mapping computer

programs had recently demonstrated that the three world-famous pyramids on Egypt's Giza plateau formed an exact terrestrial diagram of the three belt stars in the constellation of Orion.¹⁴ Nor was this the limit of the celestial map the Ancient Egyptian priests had created in the sands on the west bank of the Nile. Included in their overall vision, as we shall see in Parts VI and VII, there was a natural feature

- the river Nile- which was exactly where it should be had it been designed to represent the Milky Way.¹⁵

The incorporation of a celestial plan' into key sites in Egypt and / Page 182 / Mexico did not by any means exclude religious functions. On the contrary, whatever else they may have been intended for it is certain that the monuments of Teotihuacán, like those of the Giza plateau, played important religious roles in the lives of the communities they served.

The notion of pyramids as devices designed (presumably in some metaphysical sense) 'to turn men into gods' was, it seemed to me, too idiosyncratic and peculiar to have been arrived at independently in both Ancient Egypt and Mexico. **So, too, was the idea of using the layout of sacred sites to incorporate a celestial plan.**

Moreover, there were other strange similarities that deserved to be considered.

Just as at Giza, three principal pyramids had been built at Teotihuacán: the Pyramid / Temple of Quetzalcoatl, the Pyramid of the Sun and the Pyramid of the Moon. Just as at Giza, the site plan was not symmetrical, as one might have expected, but involved two structures in direct alignment with each other while the third appeared to have been deliberately offset to one side. Finally at Giza, the

summits of the Great Pyramid and the Pyramid of Cephren were level, even though the former was a taller building than the latter./ Page 183 Likewise, at Teotihuacán, the summits of the Pyramids of the Sun and the Moon were level even though the former was taller. The reason was the same in both cases: the Great Pyramid was built on lower ground than the Pyramid of Cephren, and the Pyramid of the Sun on lower ground than the Pyramid of the Moon.²¹

Could all this be coincidence? Was it not more logical to conclude that there was an ancient connection between Mexico and Egypt? [Editor's Note: Absolutely!]

For reasons I have outlined in Chapters Eighteen and Nineteen [*Fingerprint of the Gods*] I doubted whether any direct, causal link was involved - at any rate within historic times. Once again, however, as with the Mayan calendar, and as with the early maps of Antarctica, was it not worth keeping an open mind to the possibility that we might be dealing with legacy: that the pyramids of Egypt and the ruins of Teotihuacán might express the technology, the geographical knowledge, the observational astronomy (and perhaps also the religion) of a forgotten civilization of the past which had once, as the *Popol Vuh* claimed, 'examined the four corners, the four points of the arch of the sky, and the round face of the earth'?

There was widespread agreement among academics concerning the antiquity of the Giza pyramids, thought to be about 4500 years old.²² No such unanimity existed with regard to Teotihuacán. Neither the Street of the Dead, nor the Temple of Quetzalcoatl, nor the pyramids of the Sun and the Moon had ever been definitively dated.²³ **The majority of scholars believed that the city had flourished between 100 BC and AD 600, but others argued strongly that it must have risen to prominence much earlier, between 1500 and 1000BC. There were others still who sought, largely on geological grounds, to push the foundation date back to 4000 BC before the eruption of the nearby volcano Xitli.**²⁴ [Please Note: This author subscribes to a much later date pushing the timeframe back to the era before Noah and/or shortly thereafter.]

Amid all this uncertainty about the age of Teotihuacán, I had not been surprised to discover that no one had the faintest idea of the identity of those who had actually built the largest and most remarkable metropolis ever to have existed in the pre-Columbian New World.²⁵ All that could be said for sure was this: when the Aztecs, on their march to imperial power, first stumbled upon the mysterious city in the twelfth century AD, its colossal edifices and avenues

were already old beyond imagining and so densely overgrown Page 184 / that they seemed more like natural features than works of man.²⁶

"... We have already considered the possibility that the Way of the Dead may have served as a terrestrial counterpart of the Milky Way. Of interest in this regard is the work of another American, Alfred E. Schlemmer, who - like Hugh Harleston Jr. - was an engineer. Schlemmer's field was technological forecasting, with specific reference to the prediction of earthwakes³¹ on which he presented a paper / Page 185 at the Eleventh National Convention of Chemical Engineers (in Mexico City in October 1971).

Schlemmer's argument was that the Street of the Dead might never have been a street at all. Instead, it might originally have been laid out as a row of linked reflecting pools, filled with water which had descended through a series of locks from the Pyramid of the Moon, at the northern extreme, to the citadel in the south.

[Note: Some extraneous materials are purposefully omitted – however, please observe that Hancock is walking all over the Dimensions of Paradise but not having the faintest notion upon what he treads!]

As I walked steadily northwards towards the still-distant Moon Pyramid, it seemed to me that this theory had several points in its favor. For a start the 'Street' was blocked at regular intervals by high partition walls, at the foot of which the remains of well made sluices could clearly be seen. Moreover, the lie of the land would have vacillated a north-south hydraulic flow since the base of the Moon Pyramid stood on ground that was approximately 100 feet higher than the area in front of the citadel. The partitioned sections could easily have been filled with water and might indeed have served as reflecting pools..." "...Finally, the Teotihuacán Mapping Project (financed by the National Science Foundation in Washington DC and led by Professor Rene Millon of the University of Rochester) had demonstrated conclusively that the ancient city had possessed 'many carefully laid-out canals and systems of branching waterways, artificially dredged into straightened portions of a river, which formed a network within Teotihuacán and ran all the way to [Lake Texcoco], now ten miles distant but perhaps closer in antiquity'.³²

I continued to walk northwards along the Street of the Dead and turned east towards the Pyramid of the Sun... [Hancock simply concludes that “giants may have been the culprits” who turned themselves into “gods” (demigods?) who were in time past the architects and builders of Teotihuacán – again, absolutely nothing

whatsoever is said of the Dimensions of Paradise...yet, he was starring it straight in the face!] (Source: [AZAZAZAZAZAZAZAZ](#) – that's it)

It may be duly noted that Hancock and Michell were in close contact and shared a great deal of commonality insofar as Sacred Geometric impressions concern – appearing as speakers at [conferences](#) and the like...specializing in “other worldly” possibilities. Again, antiquity is peppered with these monuments and artifacts – most convey a “system of measurement” far in advance of what we may have surmised and yet, so incredibly familiar to those living today – especially those in America who stubbornly maintain their affection to the Imperial Mile and could care less amongst the common folk of anything metric...so entrenched – even addicted – to this system of measurement that the world's earth must belabor their “arcane ways” from gallons to Fahrenheit, from pounds to miles!

Yet, be it clearly known that the Statute Mile (5,280 Feet) and Nautical Mile (6,072 Feet – Note: Nautical Earth = 21,600 Miles * 5,280' = 131,155,200 Ft. / 5,280 Ft. = 24,840 Statute Mile Earth or 21,600 Miles * 6,072 = 131,155,200 Ft. ... the Polar Meridian Earth Circumference is 24,883.2 Miles) are a product or have their basis in the Sacred Cubit of 25.20" (2.1 Ft.).

It is the same cubit reflected in the Great Pyramid of Giza...756' (base edge) * 4 (the entire base of the Great Pyramid of Giza) = 3,024 Feet / 2.1' (Sacred Cubit) = 1,440 Sacred Cubits * 3 (if cubed with 12 edges) = 4,320 Sacred Cubits and 432 is the fractal of the radius of the sun's having a diameter of 864,000 miles / 2 = 432,000 miles.

The Sumerian foot of 13.2" is likewise overwhelmingly influenced by the Sacred Cubit and ipso facto by the Imperial Mile which simply “Anglicized” its dimensions. The Citadel proclaims as much in that 1,320' (base edge) * 4 = 5,280' (one mile) – with the entire complex set upon the basis of the 21,120 Feet rectangular form of the Sacred District – i.e., “21” and “12” which is likewise the platform of the Peruvian Sun-Star-Cross with her 21 x 21 small squares of 26.4 Ft. x 26.4 Ft.

Yes – the Sacred Cubit based upon the calendrical days of the Earth's Rotation toward the Sun wherein each day constitutes $360^\circ * 7 = 2520^\circ$ - the very presence of God abides within its confines for He rested on the Seventh Day from all His labors and it was good...therefore, are we not surprised that the very Ark of the Tabernacle in the Wilderness where His Shekinah Glory was displayed had dimensions of “22 Cubits” (total 12 edges of the rectangular-shaped box having its

height and width at 1.5 cubits and its length at 2.5 cubits or $12 + 10 = 22$ cubits according to [Exodus 25:10](#)). Astounding then that these $22 \text{ Cubits} * 25.20'' = 554.4'' / 12'' = 46.2 \text{ Ft.} * 2 = 92.4'$ or 924 and this 924 is truly the fractal of the entire cubed Great Pyramid of Giza at $756' * 12 = 9,024'$ or $924 = 924$. Likewise, the $26.4' \times 26.4'$ measurement of the Peruvian Sun-Star-Cross 21 x 21 platform necessitates that 21 such blocks $* 26.4' = 554.4'$ on each of her edges which is a fractal of the Ark of the Covenant's measurement of 554.4'' – and, of course, all this is happenstance to the extreme! ...And this is to say nothing of Glastonbury and Aubrey Circle/Stonehenge!

But you say you're still not convinced – well, then, allow me to blow your mind before we conclude this episode. In our reconsiderations of Noah's Ark we find this rectangular-shaped object of immensity found in Genesis 6:15-16 is described having a measurement of "The length of the ark shall be three hundred cubits, its width fifty cubits, and its height thirty cubits... You shall make a window for the ark and you shall finish it to a cubit from above...."

Therefore, there are in this cubed rectangle with window atop the following:

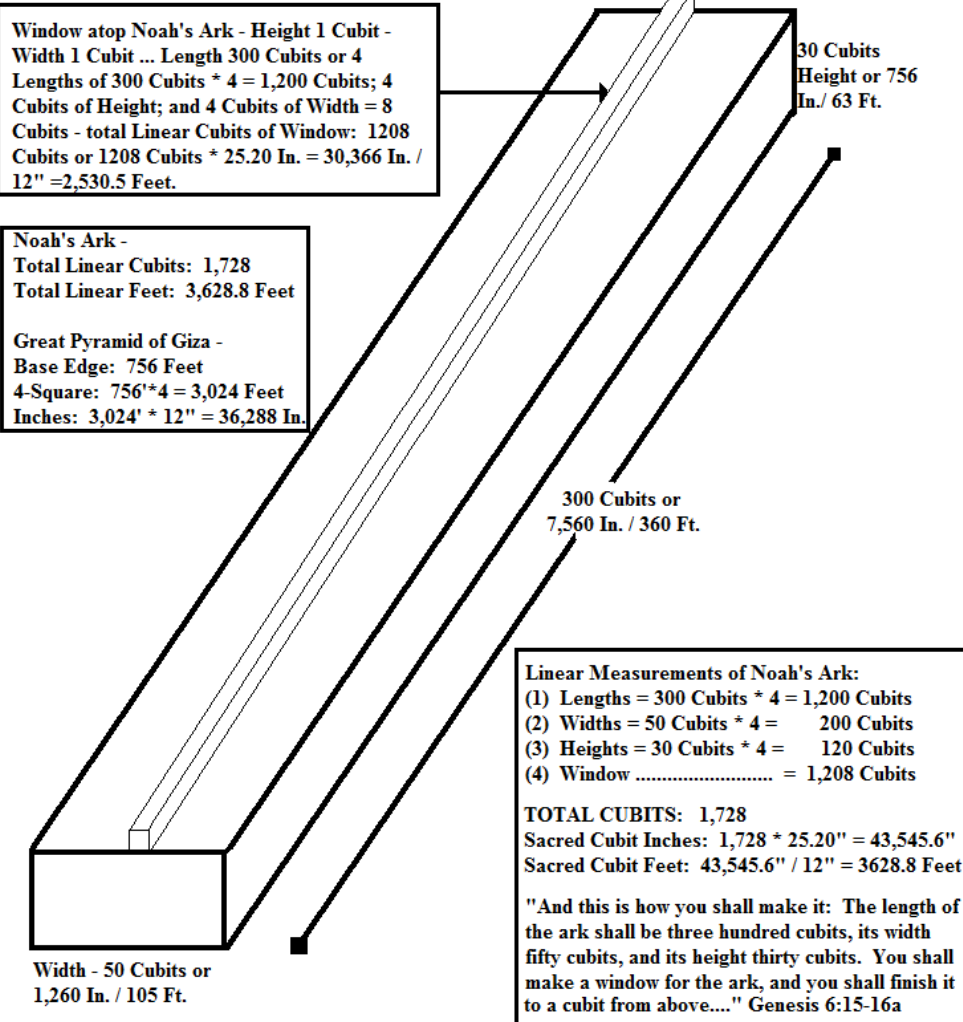

300 Cubits Length * 4 Edges = 1,200 Cubits
 50 Cubits Width * 4 Edges = 200 Cubits
 30 Cubits Height * 4 Edges = 120 Cubits
 Total: 1,520 Cubits...but we must calculate the "window" –

The window is the length of the entire vessel – "cubit from above" is 300 Cubits (four lengths) $* 4 = 1,200$ cubits + 4 heights of 1 cubit each or 4 Cubits and 4 widths of 1 cubit each $* 4 = 4$ Cubits for a total of $1,200 + 4 + 4 = 1,208$ Cubits. This must be added to the 1,520 Cubits or $1,208 + 1,520 = 1,728$ Cubits or $12 * 12 * 12 = 1,728$ or 12^3 – and, since the Sacred Cubit's credibility from the "get-go" is at stake here in that these are the first-mentioning of the "cubit" in Sacred Canon – therefore: $1,728 \text{ Cubits} * 25.20'' = 43,545.6'' / 12'' = 3,628.8 \text{ Linear Feet}$ or 36288.

"The cubit from above" connotes the windows [height](#); therefore, since no other measurement is given, it is altogether obvious that one small "cubit x cubit" window would have been entirely insufficient; however – one such window the full length of the Ark's 300 cubits is altogether reasonable with its width the same as its height – such a display has been seen in many an artist's concept.

Scoffers – I have a great deal of “righteous contempt” for their stupidities – but can you see it? I go “burning in the spirit” and once and for all connect the dimensions of Noah’s Ark with that of The Great Pyramid of Giza.

NOAH'S ARK & THE GREAT PYRAMID OF GIZA UNDER THE 25.20" SACRED CUBIT

Noah's Ark in Sacred Cubits has 1,728 Cubits (or $12 * 12 * 12 = 1,728$ (multiplier used to determine the number of cubic inches in a square foot)). Also: $1,728 \text{ Cubits} * 25.20" \text{ (Dimension of the Sacred Cubit)} = 43,545.6"$ and in feet = $3,628.8 \text{ Feet} / 144 = 25.2$ sets of 144 or the Sacred Cubit's 25.2 itself.

The base perimeter of the Great Pyramid of Giza is $3,024 \text{ Linear Feet} * 12" = 36,288 \text{ Inches} / 144 = 252$ sets of 144 or $3,024 \text{ Linear Feet} / 2.1' \text{ (Sacred Cubit in Feet)} = 1,440$ sets of 2.1 Feet.

Conclusion: Noah's Ark and the Great Pyramid of Giza share compatible dimensions under the influence of the Sacred Cubit's 25.20" measurement and are, therefore, a continuation of the Divine Plan of the Ages.
 Prepared by Doug Krieger

The Great Pyramid of Giza's base is $756' * 4 = 3,024$ Linear Feet $* 12'' = 36,288''$ or 36288 and Noah's Ark is 36288 and both of these extensions echo the coming of Messiah in that their digit sums come to "27" as in $3 + 6 + 2 + 8 + 8 = 27$.

The geodesy of the many moons of Teotihuacán is simply an extension of these Divine Measurements which rivet our attention. Skeptics will be bemused by such alleged happenstance (in their opinion) but the confirmation of these details declaring the purposes of God should cause all of us to reconsider their importance and the vision which they convey of the New Jerusalem.
